War Controlling Escalation:

War Richard Smoke,1977 **Secret Wars** Austin Carson,2020-06-09 Secret Wars is the first book to systematically analyze the ways powerful states covertly participate in foreign wars showing a recurring pattern of such behavior stretching from World War I to U S occupied Iraq Investigating what governments keep secret during wars and why Austin Carson argues that leaders maintain the secrecy of state involvement as a response to the persistent concern of limiting war Keeping interventions backstage helps control escalation dynamics insulating leaders from domestic pressures while communicating their interest in keeping a war contained Carson shows that covert interventions can help control escalation but they are almost always detected by other major powers However the shared value of limiting war can lead adversaries to keep secret the interventions they detect as when American leaders concealed clashes with Soviet pilots during the Korean War Escalation concerns can also cause leaders to ignore covert interventions that have become an open secret From Nazi Germany s role in the Spanish Civil War to American covert operations during the Vietnam War Carson presents new insights about some of the most influential conflicts of the twentieth century Parting the curtain on the secret side of modern war Secret Wars provides important lessons about how rival state powers collude and compete and the ways in which they avoid outright military confrontations *On Limited War, Escalation Control and Command, Control and Communications* Geo. Mark Waltensperger,NAVAL POSTGRADUATE SCHOOL MONTEREY CA.,1986 This thesis is an unclassified examination from a Western perspective of the concepts of limited war and escalation control in the context of nuclear conflict and command control and communications C3 Limited war and escalation control are intrinsically related To better understand the relationships between limited war escalation control and C3 as applied to the question of protracted nuclear war this thesis considers strategic control from a cybernetic view using a widely accepted model for the command and control process U S strategic C3 systems are discussed from the perspective of limiting war and controlling escalation Requirements such as a viable National Command Authority effective command and control positive negative control damage control assessment a shared concept of limited war civil defense and a mechanism to terminate conflict are presented as necessary to control escalation thus limiting war Author [On the Horizon](#) Reja Younis,Jessica Link,2023-05-08 The Nuclear Scholars Initiative is a signature program run by the Project on Nuclear Issues at the Center for Strategic and International Studies to engage emerging nuclear experts in thoughtful and informed debate over how to best address the nuclear community s most pressing problems The papers included in this volume comprise research from participants in the 2022 Nuclear Scholars Initiative These papers explore a range of crucial debates across deterrence arms control and disarmament communities

Controlling and Ending Conflict Stephen J. Cimbala,Sidney Waldman,1992 This provocative and authoritative study covers all the major aspects of conflict termination before and after the Cold War Cimbala and Waldman together with prominent analysts offer different insights into the key issues and military and political strategies to end and control conflict

in a radically changing world They define basic principles and consider intrawar deterrence and various ways to control and end all types of war in an age of nuclear proliferation

Uncertainty and Control Stephen J. Cimbala,1990 **Israel's Deterrence Strategy Revisited** Efraim Inbar,1994 Bernard Brodie and the Foundations of American Nuclear Strategy Barry Howard Steiner,1991 Steiner analyzes how and why Brodie s understanding of weapons of unparalleled explosive force led him to posit the need for revolutionary strategic thinking in broadminded analytic method and in the focus upon cities as nuclear targets He shows the tremendous effect Brodie s work had on the intellectual climate in which policy is determined particularly in his frequent combatting of conventional wisdom

War Control Burgess Laird,2017 In a chapter examining China s thinking on escalation the authors of a comprehensive 2008 RAND study of escalation management in the 21st century came to the stark and since widely cited conclusion that Chinese authoritative writings on escalation and escalation management through 2005 appeared to be undertheorized and still under development Understanding how Chinese military strategists think about escalation has only taken on added importance if not urgency in the eight years that have elapsed since the RAND study Questions of particular salience to U S strategists and decisionmakers include How do recent Chinese military writings describe escalation and the processes and actions by which it might occur in crisis or in war What do Chinese strategists say about escalation prevention and control their importance and the challenges of implementing them What do PLA analysts say about crises and conflict between nuclear powers and the necessity of limited means in the pursuit of limited political and military objectives in the latter in short what do they say about the concept of limited war In contrast to the Chinese military texts from the first five to eight years of this century do the more recent writings reflect a greater understanding do they even acknowledge that actions taken to deter an adversary can lead inadvertently to escalation What do PLA strategists say about thresholds and red lines and about communications between parties in time of crisis and war Finally what do authoritative texts say about escalation risks and challenges associated with the new and rapidly changing operational domains of space and cyberspace In short how are Chinese strategists accounting for escalation and limited war in their authoritative writings post 2010 Publisher s web site Nuclear Strategy, Arms Control, And The Future P. Edward Haley,Jack Merritt,1988-12-04

Prospects for Security in the Mediterranean International Institute for Strategic Studies,1988 Af indholdet The Arab Isreali Conflict The Conflict over Lebanon Europe the Middle East and North Africa Terrorism around the Mediterranean

NATO Strategy and Ballistic Missile Defence Ivo H. Daalder,1988 SCOTT copy 2 From the John Holmes Library collection *Nuclear Strategizing* Stephen J. Cimbala,1988-08-03 Challenging much of the conventional and established approaches to deterrence and crisis management Cimbala suggests that a decisionmaker in a crisis situation attempts to cope with a developing situation rather than rationally consider predetermined options ISBN 0 275 92987 6 39 95 *Force and Statecraft* Gordon Alexander Craig,Alexander L. George,1990 This edition has been revised and updated to include recent information on US Soviet security co operation coverage of the policies of the Reagan

administration and a new analysis of the state of the current international security systems **World Politics** Michael K. Hawes,1990 **De Veiligheid Van Europa** ,1991 Opstellen over internationale verhoudingen in de ontwikkeling van het Europese Statensysteem van de zestiende eeuw tot heden Congress Varnika ,1984 **Gandhi Marg** ,1966 Strategy After Deterrence Stephen J. Cimbala,1991-01-30 The profound political changes in the USSR and Eastern Europe during 1989 have forced the United States and its Western European allies to reevaluate both their long held military strategy of nuclear deterrence and the traditional role of NATO in European affairs In this volume Stephen Cimbala considers the ways in which American military priorities will have to change now that the tangible threat to Europe has been removed exploring the options available to America and NATO given the new political and economic realities in Europe and the Soviet Union Drawing upon a rich literature of Soviet and American defense strategy Cimbala examines the structure and effectiveness of deterrence as a military strategy the relationship between conventional and nuclear weapons the likely course of future conflicts and alternative military strategies Following an introductory chapter which defines the concepts of deterrence and dissuasion and offers an overview of the changing character of European politics Cimbala reviews the political context for the development of military strategy in Europe Subsequent chapters consider the relationship between military stability and the likelihood of winning wars in their initial stages analyze the issue of deterrence during war discuss the potential for atypical wars in the future and investigate the linkages between deception and deterrence A separate chapter addresses the attempt to substitute non nuclear dissuasion for nuclear deterrence in the form of anti nuclear strategic defenses which could defeat nuclear offenses In the final chapter Cimbala summarizes his conclusions and makes some additional observations about the implications of our new view of NATO and deterrence Students of international relations foreign policy and military studies will find Cimbala s work enlightening and provocative reading **Nuclear Demonstration Strikes and Superpower Crisis Behavior** Paula Marie Fleming,1990
