Wars End:

How Wars End Dan Reiter, 2009-09-06 Dan Reiter explains how information about combat outcomes and other factors may persuade a warring nation to demand more or less in peace negotiations and why a country might refuse to negotiate limited terms and instead tenaciously pursue absolute victory if it fears that its enemy might renege on a peace deal He fully lays out the theory and then tests it on more than twenty cases of war termination behavior including decisions during the American Civil War the two world wars and the Korean War Reiter helps solve some of the most enduring puzzles in military history such as why Abraham Lincoln issued the Emancipation Proclamation why Germany in 1918 renewed its attack in the West after securing peace with Russia in the East and why Britain refused to seek peace terms with Germany after France fell in 1940

How Wars End Damien Kingsbury, Richard Iron, 2022-12-27 This book addresses one of the most important issues in international relations how wars are ended The volume draws on the direct experience of both soldiers and academics who in each case have also been advisers on fighting and ending wars Unlike more theoretical works the book draws on first hand experiences in the case studies which include the wars in Iraq Afghanistan Sierra Leone and Indonesia among others The volume is constructed around a series of themes The first theme is why wars start and how they can be understood based on the assumption that knowing how and why wars start is fundamental to understanding how they might end The second is what sustains wars and what makes them difficult to end Again once wars start understanding what keeps them going is critical to how to end them The third focuses on the role of external intervention in ending wars including as a belligerent partner in war as a peacemaking or peacekeeping force and as a mediator between warring parties The fourth addresses the issue of ripeness and the right conditions for ending wars The fifth addresses the modalities for ending wars and creating peace with the sixth theme being focused on transitions to peace and what is required to help make those transitions successful The book will be of interest to students of military strategic and security studies peace studies and International Relations

Stopping Wars James D D Smith, 2018-03-13 This is an attempt to catalogue the reasons why some wars are so difficult to stop even when both sides want the fighting to end Through detailed case studies the book assesses the obstacles and points toward solutions for ending wars more quickly Each chapter is devoted to a specific obstacle which the author analyzes and then illustrates with case studies drawing on such conflicts as the Iran Iraq War the Gulf War and the Yugoslav wars He assesses the role of third parties in trying to persuade people to stop fighting and examines what happens when obstacles to a cease fire cannot be overcome

The Indictment of War, 1919 Unity, 1907 *Why Wars End* David J. Oberst, Army War College (U.S.), 1992 Although war termination is an essential part of military strategy the subject has received relatively little attention Despite a burst of interest spurred by the U S experience in Vietnam there is no generally accepted theory to explain the process of ending a

war Beginning with a discussion of the ways in which wars have ended this paper reviews a number of theoretical propositions that have been advanced to explain the conditions necessary for two countries at war to cease hostilities It views war termination as a rational decision process in which the participants weigh the potential gains of continuing the war against risks and costs This general proposition is developed into a detailed expected utility model in which the probabilities and utilities of possible settlements and the costs of continuing the war are the key variables A variety of other factors such as public support and mobilization potential that have been suggested as being key factors influencing war termination decisions are then examined It is concluded that the impact of all relevant factors can be reflected through their effect on the three basic variables of probability utility and cost The paper concludes by offering some observations of how the expected utility model could be employed as an analytic framework for developing war termination strategies
