## **Waters Edge Beyond Defining The Limits:**

**Indonesia beyond the Water's Edge** R. B. Cribb, Michele Ford, 2009-07-29 Indonesia is the world's largest archipelagic state with more than 18 000 islands and over 7.9 million square kilometres of sea. The marine frontier presents the nation with both economic opportunities and political and strategic challenges. Indonesia has been affected more than most countries in the world by a slow revolution in the management of its waters. Whereas Indonesia's seas were once conceived administratively as little more than the empty space between islands, successive governments have become aware that this view is outmoded. The effective transfer to the seas of regulatory regimes that took shape on land such as territoriality has been an enduring challenge to Indonesian governments. This book addresses issues related to maritime boundaries and security, marine safety, inter-island shipping, the development of the archipelagic concept in international law, marine conservation, illegal fishing, and the place of the sea in national and regional identity.

**Beyond Alliance** Kamil Mansūr, 1994 This nonpolemical discussion of America's policy towards Israel exposes the controversy surrounding whether Israel has strategic value to the USA or is instead a liability.

**The Water's Edge and Beyond** Mitchell Geoffrey Bard, 1991-01-01 One of the most commonly held notions in American politics is that American Jews have a great deal of influence on U.S. foreign policy. Some influential Americans have even argued that Jewish Americans control American policy in the Middle East to the detriment of the national interest. Such views are readily accepted by leaders of the Arab world and influence their own policies, perspectives, and lobbying activities. How accurate is this assessment? This study provides the most thorough analysis to date of the Israeli and Arab lobbies, their effectiveness, and the impact they exerted on the American political process from 1945 onward. Bard examines the reasons for the acknowledged effectiveness of Israeli lobbying efforts and the relative ineffectiveness of Arab lobbies and compares and contrasts their approaches. He shows that lobby influence is constrained by a number of variables, including the President's own position on the issues, the specific policy content of an issue, the election cycle, the popularity of a President, and where decision-making authority resides. Using case studies, a thorough knowledge of political theory, and sophisticated quantitative analysis, Bard presents a study that will be of interest to all those concerned about Middle East policy, interest groups, and foreign policy decision-making. Above all, it will compel a retreat from stereotypical thinking about the Jewish lobby and the function of lobbies in general.
