## **World According To Pimm:**

*The World According To Pimm: A Scientist Audits the Earth* Stuart Pimm, 2001-08-10 Take a globe circling tour of our endangered planet with conservation biologist Stuart Pimm who is taking stock and keeping score We use 50 percent of the world's freshwater supply We consume 42 percent of the world's plant growth We are liquidating animals and plants 100 times faster than the natural rate of extinction Such numbers should make it clear that the human impact on our planet has been and continues to be extreme and detrimental Yet even after decades of awareness of our environmental peril there remains passionate disagreement over what the problems are and how they should be remedied Much of the impasse stems from the fact that the problems are difficult to quantify How do we assess the impact of habitat loss on various species when we haven't even counted them all And just what factors go into that 42 percent of biomass we are hungrily consuming It is only through an understanding of the numbers that we will be able to break that impasse and come to agreement Working on the front lines of conservation biology Stuart Pimm is one of the pioneers whose work has put the science in environmental science In this book he appoints himself investment banker of the global biological accounts checking the numbers gathered by tireless scientists in work that is always painstaking and often heartbreaking Pimm explains the numerical results in lucid prose With wit passion and candor he reveals the importance of understanding where those numbers come from and what they mean To do so he takes the reader on a globe circling tour of our beautiful but weary planet With Pimm as our indomitable guide we travel from the volcanic mountains and rainforests of Hawaii to the boreal forests of Siberia We see a blue whale off the Pacific coast of Mexico where the blue oceans are slowly turning to barren deserts We go birdwatching high up in the leafy canopy of the Amazon from which we can see the hundreds of smoke plumes busily working at deforestation At times the view looks rather grim But Pimm is no Cassandra he never preaches or scolds Ever optimistic this book presents a world filled with mysterious beauty the infinite variety of nature and an urgent hope that through an understanding of our planet's environmental past and present we will be inspired to save it from future extinction This book is unashamedly optimistic It is a celebration of our spectacular and fascinating world I have made no attempt to restrain my joy as I encounter its natural history and its peoples By the time you read the Epilogue you will know that our world is not doomed it is not fatally wounded but neither is it healthy It needs attention Stuart Pimm from the Prologue

*5 Easy Pieces* Daniel Pauly, 2010-07-28 *5 Easy Pieces* features five contributions originally published in *Nature* and *Science* demonstrating the massive impacts of modern industrial fisheries on marine ecosystems Initially published over an eight year period from 1995 to 2003 these articles illustrate a transition in scientific thought from the initially contested realization that the crisis of fisheries and their underlying ocean ecosystems was in fact global to its broad acceptance by mainstream scientific and public opinion Daniel Pauly a well known fisheries expert who was a co author of all five articles presents each original article here and surrounds it with a rich array of contemporary comments many of which led Pauly and his colleagues to

further study This wonderfully reflective structure dramatically illustrates how science and society influence one another sometimes to the betterment of both

**Radical Simplicity** Jim Merkel,2003-09-03 Imagine you are first in line at a potluck buffet The spread includes not just food and water but all the materials needed for shelter clothing healthcare and education How do you know how much to take How much is enough to leave for your neighbors behind you not just the six billion people but the wildlife and the as yet unborn In the face of looming ecological disaster many people feel the need to change their own lifestyles as a tangible way of transforming our unsustainable culture Radical Simplicity is the first book that guides the reader to a personal sustainability goal then offers a process to monitor progress to a lifestyle that is equitable amongst all people species and generations It employs three tools to help readers begin their customized journey to simplicity It builds on steps from Your Money or Your Life so readers can design their own personal economics to save money get free of debt and align their work with their values It uses refined tools from Our Ecological Footprint so readers can measure how much nature is needed to supply all they consume and absorb their waste And by advocating time alone in wild nature it opens readers to another reality with humanity as one species among many on a complex and inter related planet Combining lyrical narrative compassionate advocacy and absorbing science Radical Simplicity is a practical personal answer to 21st century challenges that will appeal as much to Cultural Creatives and students as to spiritual seekers policy makers and sustainability professionals

Developing Ecological Consciousness Christopher Uhl,2013-03-14 Developing Ecological Consciousness is a unique introduction to environmental studies In Christopher Uhl s view it is time to acknowledge the ways that our cultural conditioning leads to separation from self other and Earth This book charts a three step path for healing this separation first by revealing that Earth is our larger body second by detailing the sickening state of our Earth body and third by offering the tools necessary for healing both ourselves and Earth

**Tropical Conservation Biology** Navjot S. Sodhi,Barry W. Brook,Corey J. A. Bradshaw,2013-05-22 This introductory textbook examines diminishing terrestrial and aquatic habitats in the tropics covering a broad range of topics including the fate of the coral reefs the impact of agriculture urbanization and logging on habitat depletion and the effects of fire on plants and animal survival Includes case studies and interviews with prominent conservation scientists to help situate key concepts in a real world context Covers a broad range of topics including the fate of the coral reefs the impact of agriculture urbanization and logging on habitat depletion and the effects of fire on plants and animal survival Highlights conservation successes in the region and emphasizes the need to integrate social issues such as human hunger into a tangible conservation plan Documents the current state of the field as it looks for ways to predict future outcomes and lessen human impact Sodhi et al have done a masterful job of compiling a great deal of literature from around the tropical realm and they have laid out the book in a fruitful and straightforward manner I plan to use it as a reference and as supplemental reading for several courses and I would encourage others to do the same Ecology 90 4 2009 pp 1144 1145

**Conservation Biology for All** Navjot S. Sodhi,Paul R. Ehrlich,2010-01-07

Conservation Biology for All provides cutting edge but basic conservation science to a global readership A series of authoritative chapters have been written by the top names in conservation biology with the principal aim of disseminating cutting edge conservation knowledge as widely as possible Important topics such as balancing conservation and human needs climate change conservation planning designing and analyzing conservation research ecosystem services endangered species management extinctions fire habitat loss and invasive species are covered Numerous textboxes describing additional relevant material or case studies are also included The global biodiversity crisis is now unstoppable what can be saved in the developing world will require an educated constituency in both the developing and developed world Habitat loss is particularly acute in developing countries which is of special concern because it tends to be these locations where the greatest species diversity and richest centres of endemism are to be found Sadly developing world conservation scientists have found it difficult to access an authoritative textbook which is particularly ironic since it is these countries where the potential benefits of knowledge application are greatest There is now an urgent need to educate the next generation of scientists in developing countries so that they are in a better position to protect their natural resources
