neuroscientific investigation of online social cognition this Frontiers Research Topic aims at bringing together contributions from researchers in social neuroscience and related fields whose work involves the study of at least two individuals and sometimes two brains rather than single individuals and brains responding to a social context Specifically this Research Topic will adopt an interdisciplinary perspective on what it is that separates online from offline social cognition and the putative differences in the recruitment of underlying processes and mechanisms Here an important focal point will be to address the various roles of social interaction in contributing to and at times constituting our awareness of other minds For this Research Topic we therefore solicit reviews original research articles opinion and method papers which address the investigation of social interaction and go beyond traditional concepts and ways of experimentation in doing so While focusing on work in the neurosciences this Research Topic also welcomes contributions in the form of behavioral studies psychophysiological investigations methodological innovations computational approaches developmental and patient studies By focusing on cutting edge research in social neuroscience and related fields this Frontiers Research Topic will create new insights concerning the neurobiology of social interaction and holds the promise of helping social neuroscience to really go social
