Revoicing Sámi Narratives Coppélie Cocq, 2008 Computational Science and Its Applications - ICCSA 2006 Marina L. Gavrilova, 2006 *Text, Context, and Performance in Cambodia, Laos, and Vietnam* Amy Catlin, 1992 **Conceptual Change and the Constitution** Terence Ball, John Greville Agard Pocock, 1988 In this volume distinguished historians and political scientists examine the linguistic and conceptual dimension of the American Founding They analyze political discourse during the short span of years from the Revolution through ratification Discourses, Texts, Contexts Wojciech Kalaga, 1990 **International Conference on Virtual Reality and Its Application in Industry**, 2002 **The Concept of Mortal Sin in Early Christianity** Hubert Louis Motry, 1920 The Dominion of Voice Kimberly K. Smith, 1999 In this work of historically informed political theory Kimberly Smith sets out to understand how nineteenth century Americans

answered the question of how the people should participate in politics Did rational public debate the ideal that most democratic theorists now venerate transcend all other forms of political expression How and why did passion disappear from the ideology if not the practice of American democracy To answer these questions she focuses on the political culture of the urban North during the turbulent Jacksonian Age roughly 1830-50 when the shape and character of the democratic public were still fluid Smith's method is to interpret in light of such popular discourse as newspapers and novels several key texts in nineteenth century American political thought Frederick Douglass's Fourth of July speech and Narrative Angelina Grimke's debate with Catharine Beecher Frances Wright's lectures and Harriet Beecher Stowe's Uncle Tom's Cabin Such texts Smith finds highlight many of the then current ideas about the extremes of political expression Her readings support the conclusions that the value of rational argument itself was contested that the emergent Enlightenment rationalism may have helped to sterilize political debate and that storytelling or testimony posed an important challenge to the norm of political rationality Smith explores facets of the political culture in ways that make sense of traditions from Whiggish resistance to Protestant narrative testimony She helps us to understand such puzzles as the point of mob action and other ritualistic disruptions of the political process our simultaneous attraction to and suspicion of political debates and the appeal of stories by and about victims of injustice Also found in her book are keen analyses of the antebellum press and the importance of oratory and public speaking Smith shows that alternatives to reasoned deliberation like protest resistance and storytelling have a place in politics Such alternatives underscore the positive role that interest passion compassion and even violence might play in the political life of America Her book therefore is a cautionary analysis of how rationality came to dominate our thinking about politics and why its hegemony should concern us Ultimately Smith reminds the reader that democracy and reasoned public debate are not synonymous and that the linkage is not necessarily a good thing

Understanding the Founding Alan Ray Gibson, 2007 Over the course of the last century scholars have furiously debated four questions concerning the Founders and their act of creation Were the Framers motivated by their economic interests How democratic was the Framers Constitution Should we interpret the Founding using philosophical or strictly historical approaches What traditions of political thought were most important to the Framers In *Understanding the Founding: The Crucial Questions* Alan Gibson examines the preconceptions that scholars bring to these questions explores the deepest sources of scholars' disagreements over them and suggests new and thoughtful lines of interpretation and inquiry Building on his previous work *Interpreting the Founding* which offers a synoptic overview of the competing perspectives that have informed modern scholarship on the Founders

Text Understanding in LILOG Otthein Herzog, 1991-09-25 The IBM project LILOG presented in this volume represents a fundamental step beyond computer science as hitherto understood It was a successful project in every respect and has shed light on conjectured basic interrelations between knowledge processing and language definition

Knowledge processing is strongly coupled to the natural language used and for applied knowledge processing an information base is needed which defines the semantic contents and interrelations of the language. The LILOG project was an implementation of an information base in the German language. A set of tools was also developed to work with the system including structured man-machine interfaces using natural language inference algorithms and a complete subsystem to acquire and store the required knowledge. The LILOG project started in 1985 and a functional system was demonstrated in 1991. The project involved approximately 200 of the scientists working in Germany in the fields of computational linguistics, natural language understanding systems, and artificial intelligence. The project proves that a cooperative project between universities and industry can produce useful results both in pure research and in implemented methods and tools.

The Concept of Sacred Theology Joseph Clifford Fenton, 1941 **Carr V. Koch**, 2011 **Locke in America** Jerome Huyler, 1995. An account of the link between Locke's thought and the American Founding. The author argues that previous writers have misread Locke's influence on the Founders; he portrays the philosopher as a moderate 17th-century moralist advocating an individualism that fits well with classic republicanism. **AI Magazine**, 1995 **The Novels of Peter Abrahams and the Rise of Nationalism in Africa** Robert Ensor, 1992 Studies in Sacred Theology, 1927
