Mast,Anne B. Mast,1997-01-01 Autobiography of Protest in Hawai i explores the state s social and economic fabric through the comments of 35 progressive activists The activists ranging in age from the mid 30s to the late 70s comment on their involvement on issues such as housing labor land use poverty environment sexual harassment seniors and sovereignty Almost one half are women and there is an even split between those born in Hawai i and those born elsewhere The book begins with an overview of political activism in Hawai i and then records the oral history of the individual activists Each was asked to respond to factors that shaped their moral and political lives They were invited to explore the forces and events in their past that led them to take on an activist role The activists were also asked to provide personal assessments of insights gained from their experiences and how they can be applied today their analysis of Hawai i at that time and some speculation on Hawai i s future The result is a book that produces some very interesting and controversial viewpoints on Hawai i s political socialization and history *Global Urban Growth* Donald C. **Bankers Monthly** ,1923 **The Online Self** Soraj Hongladarom,2016-07-27 This book investigates the emerging

phenomenon of the self as it exists in the online world It argues for an externalist conception of self and identity one that does not depend on the continuity of consciousness of the subject It also offers an analysis of related phenomenon such as online friendship and games based on this analysis An outstanding feature of social networking sites such as Facebook and MySpace is that it allows for the user to put forward their selves or their identity onto the Internet and use the online self as an anchor to connect with any number of friends each of whom also has their own online selves A number of questions then arise which are deeply conceptual and philosophical in nature What is the metaphysical nature of this emerging online self Is it the same or fundamentally different from the offline self with which we are already familiar Since increasing numbers of people are connected to the online world this world itself seems to be taking on a reality of its own This much has been appreciated by a number of scholars in the field However there seems to be lacking a systematic study of the philosophical and metaphysical nature of the self that has become a key element in cyberspace a key topic which this volume addresses Apart from the problem of constitution of the online self this volume addresses related questions concerning personal identity in the online world and scrutinizes computer games and the characteristics that they share with social networking sites Unlike the majority of the existing literature which discusses the topic from a more social scientific perspective this volume fills the lacuna of a philosophical and theoretical study of the online world
