World Development Report 1984:

World Development Report 1984 World Bank, 1984 Long term needs and sustained effort are underlying themes in this year's report. As with most of its predecessors it is divided into two parts. The first looks at economic performance past and prospective. The second part is this year devoted to population, the causes and consequences of rapid population growth, its link to development, why it has slowed down in some developing countries. The two parts mirror each other: economic policy and performance in the next decade will matter for population growth in the developing countries for several decades beyond. Population policy and change in the rest of this century will set the terms for the whole of development strategy in the next. In both cases policy changes will not yield immediate benefits but delay will reduce the room for maneuver that policy makers will have in years to come.

, 1984 *The Politics of Global Competitiveness* Paul Cammack, 2022 Marx predicted in *Capital* 1867 that as capitalism became global patterns of work would be transformed and workers would need to develop versatility, flexibility and mobility. This general law of social production as he called it is now in evidence all around us in global value chains, zero hours contracts and contract work organised through digital platforms. It results from competition between capitalists, scientific and technological revolutions in production and incessant advances in the division of labour as production processes are broken down into ever smaller steps. This book documents the leading roles of the Paris based Organisation for Economic Cooperation and Development and the Washington based World Bank as advocates of these developments. They do not, as generally supposed, simply represent the interests of the advanced economies or the West and their transnational corporations. They promote a single global model of capitalist development without limits and on a genuinely global scale. It calls upon all states to adjust continually to the structural and social demands of competitiveness which they see as essential to the global hegemony of capital over labour. The OECD and the World Bank propose policies that give girls and women equal access to education and paid work, reform welfare to make work pay, introduce flexible labour contracts that make hiring and firing easier, focus education on skills that boost employability and draw workers in the developing world from the informal sector into the formal sector where they can be more productive. This is the politics of global competitiveness.

World Development Report 1983 World Bank Group, 1983 This World Bank report analyses how globalization and localization, the integration of the world economy and the increasing demand for local autonomy could reshape the international landscape in the new millennium. It proposes rules and structures on which to build a more effective comprehensive approach to development and provides insight into how current viewpoints can be adapted to fit evolving development concerns. The report also includes selected world development indicators and essential reference on recent trends in development.
