## **World Geography Revised:**

*World Geography* Majid Husain, 2012-10 *World Geography* provides a coherent and organized account of the world as we now know it. It looks at how people are distributed over the Earth, how they make their living from it, and how they transform it. Various geographical regions of the world are discussed in 18 chapters, including individual nations within each of these regions. Written in a logical, cogent, and convincing style, the principles of brevity and clarity have been followed throughout this fourth edition. Combining an informative text with a wealth of the latest data maps and illustrations, this book offers comprehensive coverage of almost all the countries of the world in a single volume. **Geographers** T. W. Freeman, 2015-12-14

*Geographers* is an annual collection of studies on individuals who have made major contributions to the development of geography and geographical thought. Subjects are drawn from all periods and from all parts of the world and include famous names as well as those less well known, including explorers, independent thinkers, and scholars. Each paper describes the geographer's education, life, and work, and discusses their influence and spread of academic ideas. Each study includes a select bibliography and a brief chronology. The work includes a general index and a cumulative index of geographers listed in volumes published to date. Published under the auspices of the International Geographical Union.

**The New Politics of the Textbook** Heather Hickman, Brad J. Porfilio, 2012-10-13 In an age of unprecedented corporate and political control over life inside of educational institutions, this book provides a needed intervention to investigate how the economic and political elite use traditional artifacts in K-16 schools to perpetuate their interests at the expense of minoritized social groups. The contributors provide a comprehensive examination of how textbooks, the most dominant cultural force in which corporations and political leaders impact the schooling curricula, shape students' thoughts and behavior, perpetuate power in dominant groups, and trivialize social groups who are oppressed on the structural axes of race, class, gender, sexuality, and disability. Several contributors also generate critical insight into how power shapes the production of textbooks and evaluate whether textbooks still perpetuate dominant Western narratives that normalize and privilege

patriotism militarism consumerism White supremacy heterosexism rugged individualism technology and a positivistic conception of the world Finally the book highlights several textbooks that challenge readers to rethink their stereotypical views of the Other to reflect upon the constitutive forces causing oppression in schools and in the wider society and to reflect upon how to challenge corporate and political dominance over knowledge production
