Synchronous Programming Of Reactive Systems:

   Synchronous Programming of Reactive Systems Nicolas Halbwachs,2013-06-29 This book will attempt to give a first synthesis of recent works con cerning reactive system design The term reactive system has been introduced in order to at oid the ambiguities often associated with by the term real time system which although best known and more sugges tive has been given so many different meanings that it is almost in evitably misunderstood Industrial process control systems transporta tion control and supervision systems signal processing systems are ex amples of the systems we have in mind Although these systems are more and more computerized it is sur prising to notice that the problem of time in computer science has been studied only recently by pure computer scientists Until the early 1980s time problems were regarded as the concern of performance evalu ation or of some unjustly scorned industrial computer engineering or at best of operating systems A second surprising fact in contrast is the growth of research con cerning timed systems during the last decade The handling of time has suddenly become a fundamental goal for most models of concurrency In particular Robin Alilner s pioneering works about synchronous process algebras gave rise to a school of thought adopting the following abstract point of view As soon as one admits that a system can instantaneously react to events i e   **Synchronous Programming of Reactive Systems: an Introduction to ESTEREL.** Institut National de Recherche en Informatique et en Automatique,G. Gonthier,1987   *Synchronous Programming of Reactive Systems* Simon Bloch,1987   *Tool Support for System Specification, Development and Verification* Rudolf Berghammer,Yassine Lakhnech,2012-12-06 The correct development of large com plex pieces of software demands a thorough structuring of the design process In a first phase the requirements engineering is relevant for capturing the relevant functionality and its adequate formalization in precise mathematical definitions Prototyping can can be used as a means for checking the functional behaviour at this early stage of development The ade quate specification resulting from the first phase is then the basis for the second phase which comprises the derivation of an implementation This phase requires the use of formal methods and tools to verify validate the implementation A prerequisite for applying this approach is to have a suitable mechanical support This volume contains the proceedings of the International Workshop Tool Support for System Specification Development and Verification organized June 1 4 1998 in Malente Germany This workshop is the third in a series of events devoted to this topic The first two workshops were held in 1994 in Kiel and 1996 in Bremen Germany The aim of this workshop is to provide a forum for researchers interested in the use and development of tools which support the use of mathematical techniques for the specification development and verification of systems The workshop covers the spectrum from verification tools to graphical editors and compilers The program of the workshop included an invited lecture and 26 talks The invited lecture was given by F W von Henke University ofUlm on Mechanized formal methods and system design   **Object-Based Models and Languages for Concurrent Systems** Paolo Ciancarini,Oscar Nierstrasz,Akinori Yonezawa,1995-06-20 This volume presents

carefully refereed versions of the best papers presented at the Workshop on Models and Languages for Coordination of Parallelism and Distribution held during ECOOP 94 in Bologna Italy in July 1994 Recently a new class of models and languages for distributed and parallel programming has evolved all these models share a few basic concepts simple features for data description and a small number of mechanisms for coordinating the work of agents in a distributed setting This volume demonstrates that integrating such features with those known from concurrent object oriented programming is very promising with regard to language support for distribution and software composition **European Control Conference 1991** ,1991-07-02 Proceedings of the European Control Conference 1991 July 2 5 1991 Grenoble France
