Elmasri,1994-07-28 This monograph is devoted to computational morphology particularly to the construction of a two dimensional or a three dimensional closed object boundary through a set of points in arbitrary position By applying techniques from computational geometry and CAGD new results are developed in four stages of the construction process a the gamma neighborhood graph for describing the structure of a set of points b an algorithm for constructing a polygonal or polyhedral boundary based on a c the flintstone scheme as a hierarchy for polygonal and polyhedral approximation and localization d and a Bezier triangle based scheme for the construction of a smooth piecewise cubic boundary *Cooperative Knowledge Processing for*

Engineering Design Arthur B. Baskin, George L. Kovacs, Gianni Jacucci, 2013-06-29 Cooperative working environments and their development are becoming increasingly important and ever more frequent in different industrial sectors and this book provides a scientific approach for managing Team Engineering Meta cognitive knowledge and networks are identified as the key resources enabling engineering teams to work effectively and to reduce engineering time and this book illustrates how computer support can aid cooperative work within the context of practical methodologies and examples The fields covered in the book include State of the art research in cooperative learning tools Practical examples and methodologies illustrating the implementation of cooperative networks and An interdisciplinary approach to team engineering This valuable new book is sponsored by the International Federation for Information Processing IFIP and will be essential reading for researchers engineers technical managers involved in the development of advanced applications for engineering and manufacturing and software design and engineering

Internet Applications in Product Design and Manufacturing George Q. Huang, K.L. Mak, 2012-12-06 In recent years the importance of Internet and World Wide Web WWW technologies in manufacturing industries has been rising very rapidly in a global context the impact of which is deemed most profound ever since the Industrial Revolution The waning interests in the electronic commerce and electronic business e commerce e business have spread from the heartland product development to the battlefield shop floor of manufacturing enterprises The number of web applications is ever on the rise and many practitioners are keen on trying these remote systems through web browsers to support their decision making activities Indeed product design and manufacture professionals will soon be able to benefit from such remote services and supports commercially available on the Internet The practice and performance of product development and realization are expected to make immense progress Web applications in product design and manufacture signals the beginning of a new era of the digital manufacturing enterprise However many loopholes are found in the development and application processes because of domain complexity and technology sophistication thus generating new challenges to both the developers and practitioners A simple example is the difference in the user interfaces between web applications and traditional applications Indeed abundant issues need to be resolved before the full launch of digital manufacturing can come into being
