English Watercolors Graham Reynolds, 1998-04-21 English artists have made a unique contribution to the art of watercolor painting In no other Western country has this very attractive medium been used so consistently or for works of such stature as in England between 1750 and the present day In this general survey of the whole period Graham Reynolds formerly Keeper of Paintings and of Prints and Drawings at the Victoria Albert Museum discusses the paintings of over 100 artists including the well known watercolorists such as Cozens Girtin Cotman and De Wint as well as artists who are equally known for their work in other media Gainsborough Turner Constable Sargent Henry Moore The 140 illustrations 64 in color show the work of these and lesser known artists and reveal the versatility of this medium so the reader will be introduced to its use for illustrative caricature and portraiture as well as to the finest examples of traditional landscape watercolors

Victorian Landscape Watercolors Scott Wilcox, Christopher Newall, 1992 English landscape watercolor painting a perfect marriage of genre and medium entered a lively period of experimentation in style and content during the second half of the nineteenth century with rich and diverse results Through all the changes of style and technique and all the debates over the appropriate use of the medium it was watercolor's ability to convey the timeless truth and reality of the natural world that mattered to artists critics and audiences British watercolors of the Victorian period continued to observe an essential humility before nature they remain fresh and compellingly immediate because they derived in the first place from the artists heartfelt communion with the elements of nature Victorian Landscape Watercolors begins with a consideration of the continuing influence of the great generation who earlier in the century during the extraordinary parallel rise of watercolor and landscape painting had established the landscape watercolor as a major British contribution to the arts The second chapter examines the role of the landscape watercolor in the aesthetic thought of John Ruskin whose critical voice played a dominant role in shaping that art The third chapter looks at the place of landscape within the watercolor societies and its development as it appeared in their annual exhibitions The final chapter deals with the tug of new and old foreign and native in the later Victorian period The book also features 126 watercolors from public and private collections in America and England all reproduced in full color and accompanied by individual commentaries Among the 76

artists represented are David Cox Sr and Jr Walter Crane William Holman Hunt Edward Lear Samuel Palmer James Mallord William Turner James McNeill Whistler and Ruskin himself along with dozens of lesser known masters of the medium Victorian Landscape Watercolors is published in conjunction with the first exhibition to survey this period of this particularly British contribution to the arts the exhibition organized by the Yale Center for British Art in New Haven Connecticut will also be seen at the Cleveland Museum of Art and in Birmingham England *Watercolour Course* Keith H.
