Fayad,Ralph E. Johnson,2000 Object Technology An invaluable collection of domain specific frameworks Domain Specific Application Frameworks Frameworks provide generic software architectures that can be reused indefinitely to generate new applications But they don t readily translate from one business or industry domain to another A telecommunications framework looks very different from a currency trading framework for instance Developers need instruction on how to build frameworks specific to the domains for which they program Now this book CD ROM package gives developers models and much more Each chapter is built around a case study reporting a major framework implementation or customization project The 30 examples contained in the book cover an array of application domains including Flexible manufacturing architectures Computer integrated manufacturing New generation control systems Concurrent engineering Reliable distributed computing High performance Web servers Multimedia telecommunications Networking and telecommunications Industrial visualization And many others The enclosed CD ROM gives you Example frameworks Documentation and manuals Framework code and implementation tips Sample framework architectures and models Design patterns and presentations Animated demonstrations Digital Nomads. How the era of digitalization creates alternative lifestyles Lisa-Marie Wagner,2020-06-18 Bachelor Thesis from the year 2020 in the subject Business economics Business Management Corporate Governance grade 1 6 language English abstract In this paper the phenomenon of digital nomadism in permanent employment is presented In general digital nomads are characterized by their independence of location their employment in the digital space and common values Most of them are freelancers and entrepreneurs but also employees who are part of this movement want to leave the conservative concept of normal employment and break new ground First the changes in the business world and the

emergence of digital nomadism were presented in this paper Due to a lack of literature guideline based expert interviews were conducted to gain insight into the opportunities and risks of the multi local lifestyle concept for employees and companies In addition the framework conditions for companies and digital nomads required by this work and life concept were examined and presented in detail Such a framework condition can mean for example the adaptation of processes and leadership There are also differences between completely remote companies and only partially remote companies which can lead to a split company structure In this context the similarities and differences between traditional telework and digital nomadism in permanent employment were also examined These are similar for example regarding the technical prerequisites that should be created in companies and the changed communication In addition there are challenges and opportunities that arise from the travel component and the nature of digital nomadism such as negatively impaired processes due to time differences or certain characteristics and experiences that digital nomads possess or experience that can be used positively in a professional context Thus this work not only serves a scientific purpose but also provides a practical framework for employing digital nomads in traditional companies
