**Stem Cells and CNS Development** Mahendra S. Rao, 2001-02-20 Stem Cells and CNS Development critically reviews recent findings on stem cells their involvement in neurogenesis and gliogenesis and the therapeutic implications of these findings It defines by consensus the classes of stem cells in the nervous system compares their similarities and differences discusses the gains made in identifying human homologs of neural stem cells and describes how these cells are beginning to be used for therapeutic purposes Comprehensive and cutting edge this book provides all developmental scientists and neurobiologists not only an authoritative account of the current results in neural stem cell research but also an incisive review of the rapidly emerging therapeutic uses of stem cells Neural Development and Stem Cells Mahendra S. Rao, 2006 For this new edition of his celebrated work Mahendra S Rao MBBS PhD has assembled a panel of leading experts to expand and update his well received Stem Cells and CNS Development to reflect the enormous increase in our knowledge of the development of the nervous system Working from a new understanding that the regionalization of stem cells occurs early in development and that this bias appears to persist even after prolonged culture Dr Rao has added additional chapters on olfactory epithelial stem cells and retinal stem cells both of which differ in their properties from ventricular zone and subventricular zone derived neural stem cells A new chapter on cell death summarizes the important changes in the death pathway that occur as stem cells mature Special attention is paid to the derivation of neural cells from embryonic stem cells All chapters from the first edition have been extensively revised and updated Appendices provide information on neural stem cell companies stem cells and transplants patents and stem cells and US federal government guidelines on stem cells
