Orogenic-Type Polymetallic Mineralization Associated with Multistage Orogenesis in Northern North China Plate Wenbo Li, Richen Zhong, Yanjing Chen, Qiaohui Pi, 2021-03-15 This book focuses on the geological characteristics and genesis of several base metal deposits in the northern margin of the North China Plate namely the Bainaimiao Cu Au Mo the Huogeqi Cu Pb Zn the Dongshengmiao Zn Pb Cu and the Jiashengpan Zn Pb deposits These deposits have geological and geochemical affinities with orogenic type deposits such as shear zone controlled mineralization and carbon rich low salinity ore forming fluids and are characterized by multistage ore forming histories Remobilization of the pre enriched stratabound or porphyry type base metals took place as responses to orogenesis and metamorphism leading to metal redistribution and the formation of orogenic type orebodies The formation of orogenic type base metal deposits is enigmatic and the case studies presented in this book provide insights into understanding the genesis of this type of deposits In particular pre enrichment of base metals seems to be important in terms of preconditioning for later shear zone controlled mineralization since base metals are believed to have limited solubilities in the low salinity ore fluids

Well Logging and Geology Oberto Serra, Lorenzo Serra, 2003 This book is one in a series of three books by the authors on various aspects of well logging with the final book to be on reservoir evaluation The book departs from traditional log analysis books in that it has a very strong emphasis on geologic principles with an extensive review of the processes that influence hydrocarbon

accumulations The chapters are written in a stand alone format This book is beautifully illustrated with colored plots charts and block diagrams on virtually every page

Passive Margins K.R. McClay,J.A. Hammerstein,2020-07-01 This volume has evolved from papers written in memory of Professor David Roberts They summarize the key findings of recent research on passive margins from tectonics bathymetry stratigraphy and sedimentation structural evolution and magmatism Papers include analyses of the central and southern Atlantic margins of South America and Africa papers on magmatism and extension in the NE Brazilian margin and on the Cote de Ivoire margin rift architectures of the NW Red Sea margin tectonics of the eastern Mediterranean margin salt tectonics of passive margins of the Gulf of Mexico and Brazil and papers on the NW Shelf margin of Australia The volume provides readers with new insights into the complexities of passive margin systems that are in reality not so passive
