Energy Modeling in Architectural Design Timothy Hemsath, Kaveh Alagheh Bandhosseini, 2017-07-06 Energy Modeling in Architectural Design demonstrates how design elements can lead to energy savings to help you reduce the energy footprint of your buildings In addition to identifying climate opportunities you ll also learn fundamental passive design elements for software agnostic energy modeling of your projects from conception Using parametric models and testing each element during design will lead you to create beautiful and high performance buildings Illustrated with more than 100 color images this book also includes a pattern guide for high performance buildings discusses energy and daylighting optimization and has a glossary for easy reference Lighting Retrofit and Relighting James R. Benya, Donna J. Leban, 2011-03-08 The ultimate guide to the retrofitting of lighting for greater efficiency and performance Retrofitting outdated energy guzzling lighting components with green energy saving alternatives is a process that promotes sustainability and offers significant benefits for businesses contractors and the community at large Not only can retrofitting improve the overall quality and functionality of light it also can make spaces safer easier and less costly to maintain and more comfortable to inhabit From lighting technology to retrofit financial analysis Lighting Retrofit and Relighting evaluates the latest lighting system types then demonstrates how to apply them for the greatest functional and cost saving benefit This book Discusses the recent advances in lighting equipment and retrofittable controls for both interior and outdoor use Explains how to do a lighting audit to identify and evaluate logical retrofit choices Includes case studies of retrofits illustrating improvements in the quality and efficacy of new lighting Demonstrates how cost savings realized over time can not only pay for new equipment but

produce a return on the investment Lighting Retrofit and Relighting serves as an ideal reference for students or professionals whether they are energy auditors designers installers facilities managers or manufacturers by taking a close look at the most current lighting technology illuminating pathways toward a brighter future *Conference Proceedings, Green Building Challenge '98* Canada.
