Encounters: Nordic Studies in Early Childhood Didactics** Niklas Pramling,Ingrid Pramling Samuelsson,2011-08-10
Qualitative analyses of young children's learning in natural settings are rare so this new book will make educators sit up and
pay attention It lays out a Nordic or continental European teaching and learning paradigm whose didactic framework is
distinct from the Anglo American system This analysis which features contributions and case studies from researchers in a
range of subjects is built on principles such as the learner's perspective establishing sufficient intersubjectivity pointing out
and informing experience linguistically After clarifying some historical background the book discusses the contemporary
emphasis in early childhood education on pedagogy learning What should didactics mean in educating young children The
book examines the opportunities for learning that teachers provide for children in early childhood education as well as how
children respond to these opportunities It presents empirical studies from a variety of naturalistic settings including
mathematics making visual art ecology music dance literacy and story telling as well as learning about gender morality and
democracy The authors seek to answer key questions about the processes involved in both teaching and learning What

challenges do teachers face as they try to expand children's knowledge in various fields of learning How do they respond to these challenges and what can we learn about children's corresponding uptake What now requires further research One key distinction in researching children's learning is between studies that look at process and those that analyze product In the tradition of Piaget Vygotsky and Werner as well as Mercer and Valsiner's more recent work this book advocates the importance and relative rareness of the former type of study *Welcome to the Tree Stump* Alix Wood,2024 [Advances in Knowledge Discovery and Data Mining](#) David Cheung,Graham J.
