**Requirements Engineering Project-Based Learning Model Using the Electronic Learning Software Engineering System (ELINS)** Nor Azliana Akmal Jamaludin, 2015-09-21 Doctoral Thesis Dissertation from the year 2014 in the subject Computer Science Software grade Pass University of Technology Malaysia Faculty of Computing course Software Engineering Education language English abstract The success of software project depends on how well it fits the needs of its user and its environment This research strongly believes that future Requirement Engineering RE engineers should have the necessary generic skills in order to improve the quality of producing Software Requirement Specification The software industry claims that the software engineering graduates are not able to meet their requirements for employability Thus confronting the problems right from the Higher Learning Education level that lead to this disparity will save the software industry the cost of sending new employees for additional training The objectives of this research are to develop new learning environment model that can be implemented in RE education construct a prototype namely Electronic Learning Software Engineering System ELINS that allows the industry educators and Software Engineering SE undergraduate students to actively communicate and collaborate and measure the effectiveness of the proposed learning model in teaching RE and enhancing the generic skills of SE undergraduates This research comprises of pilot and main study to gather the requirement from experience of software industry personnel before evaluating the students after they involve in experimental test The interview findings from the pilot study provided inputs which guide this research to develop the actual questionnaire for the main study The study discusses the factors causes expected attributes and importance of allowing undergraduates to improve their generic skills through actual hands on participation Rasch Measurement Model s software WinStep is used to

analyze the raw data In experimental test students are provided with opportunities to practise how to deliver the SRS by doing several case studies from the software industry The analysis and results have shown a positive improvement of the generic skills among the students who were involved in the Requirement Engineering Project Based Learning RE PjBL model environment compared to those who were taught the course by traditional methods with minimal cost The results conclude that the RE PjBL which are facilitated by ELINS can enhance student s knowledge skills and attitude effectively *Software Engineering: A Practitioner's Approach* Roger S. Pressman,2010 For over 20 years this has been the best selling guide to software engineering for students and industry professionals alike This seventh edition features a new part four on web engineering which presents a complete engineering approach for the analysis design and testing of web applications *Trends and Applications: 1981* ,1981 Software Process Improvement with CMM Joseph Raynus,1999 Here s a practical step by step approach for improving your organization s software development process using the Software Engineering Institute s Capability Maturity Model CMM The book gives software project managers and administrators a real world understanding of software process improvement with CMM and how it can be implemented in each stage of the software development lifecycle Trends and Applications Symposium on Trends and Applications,1982 **Future of Software Engineering 2007** Lionel C.
