Unobtrusive Methods In Social Research:

Unobtrusive Methods in Social Research Raymond M. Lee, 2000 Social researchers often collect self report data based on interviews and surveys There are major problems associated with the reactive nature of these data for example people are not always honest when asked to supply information on sensitive issues Unobtrusive methods produce data that are not elicited in this way Instead data are found in the word captured from various forms of observation or are retrieved from data repositories of various kinds The production of unobtrusive methods requires considerable ingenuity on the part of the researcher and this book explores the methods involved and how they are produced There are also ethical problems associated with unobtrusive methods which are discussed in the book The Internet promises to be a major source of unobtrusive data and so is discussed in some detail

Unobtrusive Measures Eugene J. Webb, 1972 Thirty five years ago the four authors of this book addressed the problems of validity in social science research They were interested in new and unused methods for obtaining information The original edition and an expanded version have often been cited as justification for using novel means to supplement if not replace conventional techniques especially survey and archival research Illustrations abound in this book While the novelty of the illustrations will keep many a graduate student amused the more serious purpose is to authorize and motivate ingenuity in obtaining information Even more fundamental is the strategy of combining very different methods so that research results can by triangulation withstand threats to validity that so frequently invalidate single measure conventional research
