Handbook of Research on Power and Energy System Optimization Kumar, Pawan, Singh, Surjit, Ali, Iqbal, Ustun, Taha Selim, 2018-03-16 In recent years the development of advanced structures for providing sustainable energy has been a topic at the forefront of public and political conversation Many are looking for advancements on pre existing sources and new and viable energy options to maintain a modern lifestyle The Handbook of Research on Power and Energy System Optimization is a critical scholarly resource that examines the usage of energy in relation to the perceived standard of living within a country and explores the importance of energy structure augmentation Featuring coverage on a wide range of topics including energy management micro grid and distribution generation this publication is targeted towards researchers academicians and students seeking relevant research on the augmentation of current energy structures to support existing standards of living

Metal-Organic Framework-Based Nanomaterials for Energy Conversion and Storage Ram K. Gupta, Tuan Anh Nguyen, Ghulam Yasin, 2022-05-10 Metal Organic Framework Based Nanomaterials for Energy Conversion and Storage addresses current challenges and covers design and fabrication approaches for nanomaterials based on metal organic frameworks for energy generation and storage technologies The effect of synthetic diversity functionalization ways of improving conductivity and electronic transportation tuning in porosity to accommodate various types of electrolyte and the criteria to achieve the appropriate pore size shape and surface group of different metal sites and ligands are explored The effect of integration of other elements such as second metals or hetero atomic doping in the system to improve catalytic activity and durability are also covered This is an important reference source for materials scientists engineers and energy scientists looking to further their understanding on how metal organic framework based nanomaterials are being used to create more efficient energy conversion and storage systems Describes major metal organic framework based nanomaterials applications for fuel cell battery supercapacitor and photovoltaic applications Provides information on the various nanomaterial types used for creating the most efficient energy conversion and storage systems Assesses the major challenges of using nanotechnology to manufacture energy conversion and storage systems on an industrial scale

Applied Soft Computing and Embedded System Applications in Solar Energy Rupendra Kumar Pachauri, Jitendra Kumar Pandey, Abhishek Sharmu, Om Nautiyal, Mangey Ram, 2021-05-26 Applied Soft Computing and Embedded System Applications in Solar Energy deals with energy systems and soft computing methods from a wide range of approaches and application perspectives The authors examine how embedded system applications can deal with the smart monitoring and controlling of stand alone and grid connected solar photovoltaic PV systems for increased efficiency Growth in the area of artificial intelligence with embedded system applications has led to a new era in computing impacting almost all fields of science and engineering Soft computing methods implemented to energy related problems regularly face data driven issues such as problems of optimization classification clustering or prediction The authors offer real time implementation of soft computing

and embedded system in the area of solar energy to address the issues with microgrid and smart grid projects both renewable and non renewable generations energy management and power regulation They also discuss and examine alternative solutions for energy capacity assessment energy efficiency systems design as well as other specific smart grid energy system applications The book is intended for students professionals and researchers in electrical and computer engineering fields working on renewable energy resources microgrids and smart grid projects Examines the integration of hardware with stand alone PV panels and real time monitoring of factors affecting the efficiency of the PV panels Offers real time implementation of soft computing and embedded system in the area of solar energy Discusses how soft computing plays a huge role in the prediction of efficiency of stand alone and grid connected solar PV systems Discusses how embedded system applications with smart monitoring can control and enhance the efficiency of stand alone and grid connected solar PV systems Explores swarm intelligence techniques for solar PV parameter estimation Dr Rupendra Kumar Pachauri is Assistant Professor Selection Grade in the Department of Electrical and Electronics Engineering University of Petroleum and Energy Studies UPES Dehradun India Dr Jitendra Kumar Pandey is Professor Head of R D in the University of Petroleum and Energy Studies UPES Dehradun India Mr Abhishek Sharma is working as a research scientist in the research and development department UPES India Dr Om Prakash Nautiyal is working as a scientist in Uttarakhand Science Education Research Centre USERC Department of Information and Science Technology Govt of Uttarakhand Dehradun India Prof Mangey Ram is working as a Research Professor at Graphic Era Deemed to be University Dehradun India

Research Anthology on Clean Energy Management and Solutions Management Association, Information Resources, 2021-06-25 Energy usage and consumption continue to rise globally each year with the most efficient and cost effective energy sources causing huge impacts to the environment In an effort to mitigate harmful effects to the environment implementing clean energy resources and utilizing green energy management strategies have become worldwide initiatives with many countries from all regions quickly becoming leaders in renewable energy usage Still not every energy resource is without flaws Researchers must develop effective and low cost strategies for clean energy in order to find the balance between production and consumption The *Research Anthology on Clean Energy Management and Solutions* provides in depth research that explores strategies and techniques used in the energy production field to optimize energy efficiency in order to maintain clean and safe use while delivering ample energy coverage The anthology also seeks solutions to energy that have not yet been optimized or are still produced in a way that is harmful to the environment Covering topics such as hydrogen fuel cells renewable energy solar power solar systems cost savings and climate protection this text is essential for electrical engineers nuclear engineers environmentalists managers policymakers government officials professionals in the energy industry researchers academicians and students looking for the latest research on clean energy management
