Matlin, 1989-01-01 *Research in the Language Classroom* Christopher Brumfit, Rosamond Mitchell, 1990 Intended for teachers this text provides a survey of how research can be utilized and how classroom practices can be examined Topics covered include the roles of systematic and unsystematic observation research into learner and teacher behaviour teaching theory and writing up research

Classroom Oriented Research in Second Language Acquisition Herbert W. Seliger, Michael H. Long, 1983 **Student Engagement in the Language Classroom** Phil Hiver, Ali H. Al-Hoorie, Sarah Mercer, 2020-12-02 This book defines engagement for the field of language learning and contextualizes it within existing work on the psychology of language learning and teaching Chapters address broad substantive questions concerned with what engagement is or looks like and how it can be theorized for the language classroom methodological questions related to the design measurement and analysis of engagement in language classrooms and beyond as well as applied issues examining its antecedents factors inhibiting and enhancing it and conditions fostering the re engagement of language learners who have become disengaged Through a mix of conceptual and empirical chapters the book explores similarities and differences between motivation and engagement and addresses questions of whether how and why learners actually do exert effort allocate attention participate and become involved in tangible language learning and use It will serve as an authoritative benchmark for future theoretical and empirical research into engagement within the classroom and beyond and will be of interest to anyone wishing to understand the unique insights and contributions the topic of engagement can make to language learning and teaching **The Routledge Handbook of Language Learning and Teaching Beyond the Classroom** Hayo Reinders, Chun Lai, Pia Sundqvist, 2022-05-30 Informal language learning beyond the classroom plays an important and growing role in language

learning and teaching This Handbook brings together the existing body of research and unites the various disciplines that have explored this area in order to present the current state of knowledge in one accessible resource Much of adult learning takes place outside of formal education and for language learning it is likely that out of class experiences play an equally important role It is therefore surprising that the role of informal language learning has received little attention over the years with the vast majority of research instead focusing on the classroom Researchers from a range of backgrounds however have started to realise the important contribution of informal language learning both in its own right and in its relationship with classroom learning Studies in the areas of learner autonomy learning strategies study abroad language support learners voices computer mediated communication mobile assisted language learning digital gaming and many others all add to our understanding of the complex and intersecting ways in which learners construct their own language learning experiences drawing from a wide range of resources including materials teachers self study technology other learners and native speakers This Handbook provides a sound and comprehensive basis for researchers and graduate students to build upon in their own research of language learning and teaching beyond the classroom

**Second and Foreign Language Learning Through Classroom Interaction** Joan Kelly Hall, Lorrie Stoops Verplaetse, 2000-06-01 This volume brings together the current theoretical interest in reconceptualizing second and foreign language learning from a sociocultural perspective on language and learning with practical concerns about second and foreign language pedagogy It presents a set of studies whose focus is on the empirical description of particular practices constructed in classroom interaction that promote the learning of a second or foreign language The authors examine in detail the processes by which the learning of additional languages is accomplished in the interaction of a variety of classrooms and in a variety of languages Not only will the findings from the studies reported in this volume help to lay a foundation for the development of a more expansive sociocultural model of second and foreign language learning but on a more practical level they will help language educators in creating a set of principles for identifying and sustaining classroom interactional practices that foster additional language development The volume is distinguished in three ways Following a Vygotskian perspective on development the studies assume that language learning is a fundamentally pragmatic enterprise intrinsically linked to language use This breaks from a more traditional understanding of second and foreign language learning which has viewed learning and use as two distinct phenomena The importance of classroom interaction to additional language development is foregrounded The investigations reported in this book are distinguished by their methodological approach Because language learning is assumed to be a situated context sensitive and dynamic process the studies do not rely on traditional experimental methods for collecting and analyzing data but rather they involve primarily the use of ethnographic and discourse analytic methods The studies focus on interactional practices that promote second and foreign language learning Although a great deal of research has examined first language learning in classrooms from a sociocultural perspective little has looked at second and foreign language

classrooms from such a perspective Thus there is a strong need for this volume of studies addressing this area of research Researchers teacher educators and graduate students across the fields of second and foreign language learning applied linguistics and language education will find this book informative and relevant Because of the programmatic implications arising from the studies it will also appeal to teacher educators and teachers of second and foreign languages from the elementary to the university levels
