Policy and Economic Growth in Eras of Globalization Edward M. Feasel, 2018-06-13 This book provides an excellent resource for understanding the forces in international trade liberalization over two centuries that have brought us to this point where the successes setbacks and the countervailing forces now vie for the public s mind and support the outcome of which will determine the future progress of increased globalization or lack thereof The book also examines whether trade policy has indeed promoted exports in the vast number of countries which increasingly look to trade agreements to gain a competitive edge and to what extent export driven growth has been an important force in advancing economic development around the world In doing so the book examines one of the most controversial issues in economic development the promotion and significance of export led growth Revisiting the Link between Trade, Growth and Inequality Ms. Kimberly

Beaton, Aliona Cebotari, Andras Komaromi, 2017-03-09 We revisit the relationship between international trade economic growth and inequality with a focus on Latin America and the Caribbean The paper combines two approaches First we employ a cross country panel framework to analyze the macroeconomic effects of international trade on economic growth and inequality considering the strength of trade connections as well as characteristics of countries export markets and products Second we consider event studies of past episodes of trade liberalization to extract general lessons on the impact of trade liberalization on economic growth and its structure and inequality Both approaches consistently point to two broad messages First trade openness and connectivity to the center of the trade network has substantial macroeconomic benefits Second we do not find a statistically significant or economically sizable direct impact of trade on overall income inequality

Trade and Economic Growth Juan Carlos Moreno-Brid,Esteban Pérez Caldentey,2009 In Latin America the dominant understanding of the relationship between trade and growth has evolved radically over time This paper analyses the different approaches to trade and growth in Latin America from the end of WWII to the present day Specifically it examines the underlying rhetoric of these alternative approaches and the extent to which their rhetoric matched their understanding of Latin American reality It is shown that throughout the period under study the relationship between trade and growth was far from robust In other words the region has been unable to make exports the lynchpin of rapid long run growth Addressing this failure is one of the most urgent tasks confronting Latin America and one which has received insufficient attention

Does International Trade Cause Economic Growth? A Survey Tarlok Singh,2011 This study surveys the literature on the relationship between international trade and economic growth and succinctly reviews the role of GATT WTO in fostering free trade Most studies support the gains of trade and recognise the substantive contributions of GATT WTO in fostering free trade the evidence is however not ubiquitously unambiguous The macroeconomic evidence provides a dominant support for the positive and significant effects of trade on output and growth while the microeconomic evidence lends larger support to the exogenous effects of productivity on trade as compared to the effects of trade on productivity The GATT WTO remains surrounded by barriers to trade and avowed preferences for preferential trade agreements The strength of the argument for the gains of trade needs to be evaluated in juxtaposition with several methodological and measurement issues that surround the trade growth empirics Most studies focus on partial equilibrium analysis of trade policy and ignore the general equilibrium aspects of macroeconomic policy It is difficult to disentangle the effects of trade policies from those of other macroeconomic policies and unequivocally interpret the observed correlations between trade policies and economic growth Trade is one of the several catalysts of productivity and growth and hence its contribution is contingent on its weight in economic activity
