Where Harriers Dance:

Where Harriers Dance Dean T. Spaulding, 1998-01-01 *Harrier Hawks Fly High* Andrew Gideon, 2008-06 A motivational book about the lives of Montana high school students A dream of a cross country state championship and the 1000 s of miles of sweat to live this dream Future leaders of the world and from Montana High school life in its finest form running at a high level and a quest that will make a person smile laugh and cry Harriers of the World Robert E. Simmons, 2000 Harriers are a charismatic group of birds of prey with a worldwide distribution that have long fascinated bird watchers and scientists Here for the first time the biology of the world s harriers is treated within one cover in readily accessible language There are detailed comparisons of northern and southern species descriptions of mating systems and population dynamics life histories and insights into the selection pressures shaping the birds life histories The author addresses such questions as how females choose partners against their apparent self interest how they adjust to prevailing circumstances to produce the optimal clutch size and what underlies variations in size dimorphism and copulation patterns New information resulting from a DNA examination of the group reveals three new harrier species and allows construction of a new phylogeny of the harriers The book is brought to life by fine original line drawings of these impressive birds by the author s twin brother It will be a treat for all raptor biologists amateur raptophiles and behavioural ecologists interested in temperate tropical comparisons *The Raptors of Arizona* Richard L. Glinski, 2021-11-16 Thousands of birdwatchers come to Arizona each year seeking rare or intriguing species and for those watching the skies the additional sighting of a bird of prey is a reward in itself The Grand Canyon state boasts the most dramatic assortment of raptors in North America hawks eagles falcons kites and owls plus vultures and condors Here can be found nearly all the raptor species of the continental United States and also established populations of species associated with Mexico such as the Gray Hawk Common Black Hawk Zone tailed Hawk and Whiskered Screech Owl Arizona s raptors are found in an unrivaled diversity of habitats from saguaro cactus forests where tiny Elf Owls nest to the Vermilion Cliffs where the gigantic California Condor was introduced in 1996 Yet many species live in habitats that are now jeopardized by degradation or development making an understanding and appreciation of raptors crucial to their survival The Raptors of Arizona brings together the knowledge and insights of 29 raptor and wildlife authorities who provide original information and syntheses on Arizona s 42 raptor species with an emphasis on aspects of their natural history in Arizona A chapter on each bird includes its description a range map and information on its distribution habitat life history and status Additional chapters cover conservation habitats where and when to watch raptors and the sport of falconry The book is enhanced by 42 full color illustrations by Richard Sloan one of the premier wildlife artists in North America whose paintings were commissioned by the Arizona Wildlife Foundation specifically for this project Co published with the Arizona Game and Fish Department **Ireland Through Birds** Conor W. O'Brien, 2019-10-17 Twelve birds One country A wild Ireland waiting to be discovered In Ireland Through Birds Conor O

Brien takes the reader on an ornithological adventure around Ireland in search of twelve of our rarest and most elusive birds. Along the journey the author explores every kind of landscape and habitat our island has to offer across all four seasons from the remote isles of Donegal to the rugged mountains of Kerry and urban parks of Dublin. Through it all O'Brien is enchanted by calling corncrakes mesmerised by hunting harriers and chased by angry skuas. It's a journey through a staggering array of landscapes that will bring the reader face to face with the rich history and stunning wildlife to be savoured right on our doorstep. It explores the stories of the remarkable birds that live here: the genius of the jay, the sublime mimicry of the cuckoo, the nocturnal prowess of the barn owl while paying a moving poetic tribute to our natural heritage and a warning about the threats that face it. Ireland Through Birds is a unique blend of natural history and travelogue making it a great read for anyone with an interest in Ireland's natural world.
