Passive Income with Digital Planners Karna Raju, *Passive Income with Digital Planners* is the ultimate step by step business guide for anyone ready to build a sustainable automated income stream selling digital planners on Etsy. Written by Karna Raju, this comprehensive 2026 edition covers every stage of the journey from understanding the booming digital planner market and finding your profitable niche to designing stunning interactive PDF planners, crafting SEO optimized Etsy listings, and building a fully automated shop that earns money while you sleep. You will learn exactly how Etsy's algorithm works and how to master it without paid advertising. Chapters on automation, email list building, and diversifying beyond Etsy ensure your business is resilient, scalable, and not dependent on any single platform. *Passive Income with Digital Planners* is more than a business book; it is a blueprint for financial freedom. Whether you are a complete beginner or an experienced creator looking to scale, this guide gives you every tool, strategy, and system you need to generate consistent monthly profits from digital products. Your journey starts here. [Time Planning](#) Ethan Patel, AI, 2025-01-02. *Time Planning* offers a groundbreaking approach to understanding and mastering time management by bridging scientific research with practical application. The book tackles the paradox of modern life where, despite technological advancement, people experience increasing time scarcity. Through a unique combination of cognitive science, behavioral psychology, and organizational research, it presents a comprehensive framework for reclaiming control over both daily schedules and long-term objectives. The book's structure progresses logically from fundamental concepts to practical implementation, beginning with insights into how humans perceive and process time. It explores fascinating discoveries about circadian rhythms and brain states that influence productivity before introducing three core frameworks: the Priority Matrix for task categorization, Time Blocking for efficient task grouping, and Energy Management for optimizing performance periods. Each concept is supported by research from prestigious institutions like Harvard Business School and the Stanford Time Project, making complex principles accessible through real-world examples and case studies. What sets this guide apart is its integration of traditional time management principles with cutting-edge cognitive science research, acknowledging individual differences in time perception while providing adaptable solutions. The book maintains a balanced approach between theoretical understanding and practical application, offering readers concrete tools for implementation while addressing contemporary challenges like the role of technology and the myth of perfect productivity. Through structured methodology and clear explanations, it empowers readers to develop personalized time management systems that align with their natural patterns and professional needs.
