**The Great Famine** Hourly History,2019-06-11 The Great Famine The Great Famine which afflicted Ireland from 1845 to 1849 was one of the most catastrophic events in Europe during the nineteenth century More than one quarter of the population of Ireland died of starvation or associated disease or were forced to emigrate Ireland after the famine was a completely different country in many ways The direct causes of the famine are simple to understand a large part of the population of Ireland mainly the poorest families had become completely dependent on the potato as a source of food In 1845 the blight appeared a disease which affected the potato crop Successive

failures of the potato crop in Ireland led to more than one million people dying as a direct result. What is less easy to understand is why this famine was confined to Ireland and why the British government did not do more to help. The potato blight affected parts of Great Britain and other countries in Europe but nowhere else did it lead to famine. For much of the famine food continued to be exported from Ireland and at its height there was food stored in warehouses which could have been used to alleviate the suffering of the starving that it was not. Represents at the very least a complete failure of understanding on the part of the British government.

Inside you will read about Farming in Ireland, The Blight Arrives, Full blown Famine, Mass Emigration, Poor Laws, Revolt and the Return of the Blight, Aftermath and Legacy. And much more. The Great Famine left a legacy of distrust and animosity between large segments of the population of Ireland and Great Britain and this in part led to the movements which finally produced Irish independence. The famine also left a deep impression on the psyche of the people of Eire and even today Ireland remains at the forefront of international famine relief. This is the story of the Irish Potato Famine.

[The Irish Potato Famine](#) History Nerds, 2024-12-05. The Irish Potato Famine: An Gorta Mór is a gripping exploration of one of history's most devastating humanitarian crises. Between 1845 and 1852, Ireland was ravaged by a catastrophic famine that claimed over a million lives and forced millions more to flee their homeland. Yet this was far more than a tragedy of failing crops; it was a crucible of resilience shaped by the convergence of natural disaster, political neglect, and the systemic inequalities of colonial rule. Through vivid storytelling and meticulous research, this book delves into the famine's harrowing origins, its profound human cost, and its enduring legacy on Ireland and the world. Discover how the Irish people, despite unimaginable suffering, emerged with a fierce determination to survive, remember, and rebuild forever, altering their cultural and demographic landscape. More than a recounting of historical events, this is a poignant reminder of the global relevance of these lessons. As the echoes of An Gorta Mór resonate across time, the story compels readers to reflect on the responsibilities of governance, the dangers of systemic inequality, and the imperative to foster solidarity in the face of contemporary crises. The Irish Potato Famine is not just a chronicle of a tragic past; it is a universal testament to the resilience of the human spirit and the enduring quest for justice and compassion.

Rogers, 2003-08-16 Now in its fifth edition *Diffusion of Innovations* is a classic work on the spread of new ideas In this renowned book Everett M Rogers professor and chair of the Department of Communication Journalism at the University of New Mexico explains how new ideas spread via communication channels over time Such innovations are initially perceived as uncertain and even risky To overcome this uncertainty most people seek out others like themselves who have already adopted the new idea Thus the diffusion process consists of a few individuals who first adopt an innovation then spread the word among their circle of acquaintances a process which typically takes months or years But there are exceptions use of the Internet in the 1990s for example may have spread more rapidly than any other innovation in the history of humankind Furthermore the Internet is changing the very nature of diffusion by decreasing the importance of physical distance between people The fifth edition addresses the spread of the Internet and how it has transformed the way human beings communicate and adopt new ideas
