Baker,2003-09-11 What exactly is a best boy or a grip As the credits roll at the end of every film listing the names of all the individuals who contributed to its making many viewers have no idea what these people do This book reveals the mystery behind the job titles as crew members tell their stories explaining what their jobs are how they came to have a career in filmmaking and their many experiences both serious and comic The author has conducted interviews with 33 accredited members of film production crews from many different American and British films Each interview includes a brief introduction to the person as well as their filmography Examples of individuals interviewed include an assistant director a best boy a boom operator a foley artist a grip a set decorator a storyboard artist and a wrangler **Pevsner: The Complete**

Broadcast Talks Stephen Games,2016-04-22 This book brings together the surviving texts of the 113 talks on art and architecture that we know of given by the art historian Sir Nikolaus Pevsner on radio and television between 1945 1977 It includes the seven texts of the 1955 Reith Lectures in their original broadcast form as well as lectures that Pevsner gave in German for the BBC in London and RIAS in Berlin and on the radio in New Zealand These talks are important as an example of the attempt by the BBC in particular to provide intellectual programming for the mass population The talks are important for what they reveal about changing tastes in the treatment of the arts as a broadcast topic as well as offering a case study of the development of one particular historian s approach to a subject that was gaining ground in universities as a direct result of his popularisation of it They show what topics were thought to be central to the artistic agenda in the mid years of the last century whether from an academic or journalistic perspective and reveal the mode and manner of academic engagement with the public over the period Forty six of these talks were published in 2002 on the centenary of Pevsner s birth in a trade edition At the time his reputation as an active force in architectural thinking had long been eclipsed and interest in him had waned Since then there has been a turn around in tastes and Pevsner s role within his chosen field is now being actively studied and discussed by a new generation for whom he is central to an understanding of the 20th century There is therefore a real need for this book In addition to containing twice the number of talks as the previous volume it is supplemented with explanatory introductions footnotes and citations It also reveals as far as this is possible alternative versions of Pevsner s texts as they appeared at different stages in the original production process As such this edition can be relied on by
