Imagine Your Library's Future Steve O'Connor, Peter Sidorko, 2010-09-25 In this information age it is widely recognised that in order to maintain relevance and to gain a competitive edge libraries and other organisations in the business of information must continuously assess their roles collections services and perhaps most importantly their business practices Scenarios are a way of predicting and describing a future three to five years away while strongly engaging one's community in choosing the future which is preferable The horizon in which assessments about future roles change is growing shorter and shorter While it is almost clichéd to state that change is the only constant differing scenarios of what libraries might be allow all of us to contemplate futures we might otherwise not allow Drawing on extensive experience in libraries in different parts of the globe the authors provide a rich analysis of planning managing and implementing change in information organisations through scenario planning Through extensive practical applications both actual and theoretical the authors provide a strong background understanding and direct the reader through a planning process that is both readily applicable and innovative for all information organisations irrespective of their size or client base Extensive exploration of what it means to shape our futures rather than having our future shaped for us Valuable techniques for understanding futures and creating different scenarios Practical applications are illustrated through examples and real life experience **New York Libraries**, 1913 Survey of Tablet Computer Lending Programs in Libraries Primary Research Group, 2014 The 80 page study presents the results of a survey of 42 libraries with tablet lending programs or those just about to implement one The report gives detailed data and commentary on how the programs were organized financed and implemented and their impact on patrons and libraries The report helps its readers to answer questions such as how many tablets do libraries maintain for loan Which brands do they prefer and which are they planning to purchase in the future How much have they spent on their tablet lending programs and plan to spend Do they load their tablets with apps If so how do they choose them How many tablets are lost to theft Or to negligence or accidents What is the fine for overdue tablets What is the length of the lending period What are the circulation figures for tablets What has been the impact on other library resources such as a pre existing laptop lending program Or on use of the library's eBook collection Which libraries do they view as models and what advice can they offer to peers What services or training are offered to library patrons about how to use the tablets Data in the report is broken out by library type public library public college private college special library by size of library staff and size of stock of tablet loaned and other variables Know Your Library University of California, Los Angeles.
