Basic Principles of Cable Supported Bridges DR. B. C. ROY, 2024-05-15. This book presents a brief design approach for cable supported bridges based on experiences from past projects, both domestic and international, that were shared by experts in bridge engineering. The specifications outlined in the book are adopted in the design of several cable stayed and extradosed bridges in India and abroad. These specifications are in conformance with the global best practices. In addition, reference literature has been consulted during the compilation of various sections of the book. In this endeavor, the author sought suggestions and collective guidance from some eminent specialists in cable supported bridges from the USA, Europe, and Asia in order to provide a glimpse of practices across the globe. In this book, the author has attempted to highlight the basic principles of cable supported bridges, and the same should be used only as a guideline for design. It is believed that the reader would have acquired sufficient knowledge of analysis and design of complex bridges before going through this book. Lastly, brief case studies of two notable Indian bridges, the Second Vivekananda Extradosed Nivedita Bridge and Burdwan Cable Stayed Bridge, are provided. While the former is an example of extradosed structure for Hooghly River crossing, the latter is a three-pylon, first-time-in-India cable stayed bridge over railway tracks. These examples will elucidate the purpose of this book.
