Uncertainty And Intelligent Systems Lecture Notes In Computer Science 313:

Fuzzy Logic and Soft Computing Bernadette Bouchon-Meunier, Ronald R. Yager, Lotfi Asker Zadeh, 1995 Soft computing is a new emerging discipline rooted in a group of technologies that aim to exploit the tolerance for imprecision and uncertainty in achieving solutions to complex problems The principal components of soft computing are fuzzy logic neurocomputing genetic algorithms and probabilistic reasoning This volume is a collection of up to date articles giving a snapshot of the current state of the field It covers the whole expanse from theoretical foundations to applications The contributors are among the world leaders in the field

Uncertainty in Knowledge Bases Bernadette Bouchon-Meunier, Ronald R. Yager, Lotfi A. Zadeh, 1991-09-11 One out of every two men over eighty suffers from carcinoma of the prostate It is discovered incidentally in many patients with an alleged benign prostatic hyperplasia In treating patients the authors make clear that primary radical prostatectomy is preferred over transurethral resection due to the lower complication rate

Systems Reliability Assessment A.G. Colombo, Amalio Saiz de Bustamante, 2012-12-06 This book presents models and methods for systems reliability assessment human reliability analysis and uncertainty management It includes fourteen contributions which are grouped into three sections Section 1 deals with basic reliability methods and applications The papers by Saiz de Bustamante and Perlado introduce the stochastic processes and the Monte Carlo method respectively Sanz Fernandez de Cordoba and Gonzales discuss important practical implications of the use of reliability methods The former refers to the aerospace industry The latter considers nuclear power plants Session 2 presents some advances in systems reliability techniques The paper by Contini and Poucet illustrates the mathematical analysis of fault trees and event trees It includes a discussion on the logical analysis of non coherent fault trees and considerations on the major measures of criticality and importance of a component The paper by Babbio is devoted to Petri nets First the formalism of this relatively new technique is given Then stochastic Petri nets are introduced as a tool to describe the behaviour of systems in time Finally by some fully developed examples it is shown how this approach can be used to represent and evaluate complex stochastic systems Linnios introduces the notion of failure delay systems and gives the lifetime structure for the evaluation of reliability measures A reservoir is studied as an example of a failure delay system

Handbook of Fuzzy Computation E Ruspini, P Bonissone, W Pedrycz, 2020-03-05 Initially conceived as a methodology for the representation and manipulation of imprecise and vague information fuzzy computation has found wide use in problems that fall well beyond its originally intended scope of application Many scientists and engineers now use the paradigms of fuzzy computation to tackle problems that are either intractable

Fuzzy Sets in Approximate Reasoning and Information Systems J.C. Bezdek, Didier Dubois, Henri Prade, 2012-12-06 Approximate reasoning is a key motivation in fuzzy sets and possibility theory This volume provides a coherent view of this field and its impact on database research and information retrieval First the semantic foundations of approximate reasoning are presented Special emphasis is given to the representation of fuzzy rules and specialized types of

approximate reasoning Then syntactic aspects of approximate reasoning are surveyed and the algebraic underpinnings of fuzzy consequence relations are presented and explained The second part of the book is devoted to inductive and neuro fuzzy methods for learning fuzzy rules It also contains new material on the application of possibility theory to data fusion The last part of the book surveys the growing literature on fuzzy information systems Each chapter contains extensive bibliographical material Fuzzy Sets in Approximate Reasoning and Information Systems is a major source of information for research scholars and graduate students in computer science and artificial intelligence interested in human information processing

Proceedings Lawrence C. Kingsland, 1989 **Tracing Chains-of-Thought** Benjoe A. Juliano, Wyllis Bandler, 1996-04-04 We always seem to be comparing various conceptual structures in many of our higher mental activities In any case we use similarities and discrepancies in forming all our conceptual categories In this book the authors present a computerized approach to diagnosis in particular cognitive diagnosis It uses fuzzy graph structures called fuzzy cognitive maps FCMs These are used in an attempt to model the intricacies of the higher mental processes The area of structure comparison focusing on measures of similarity and discrepancy is also dealt with A very interesting aspect of the book is how the authors approached the problem of cognitive diagnosis using fuzzy techniques Some connections and differences from other approaches are also covered The reader will find this book both informative and interesting Annual Meeting of the North American Fuzzy Information Processing Society--NAFIPS. North American Fuzzy Information Processing Society.
