Indigenous Research Deborah McGregor, Jean-Paul Restoule, Rochelle Johnston, 2018-08-15
Indigenous research is an important and burgeoning field of study. With the Truth and Reconciliation Commission's call for the Indigenization of higher education and growing interest within academic institutions, scholars are exploring research methodologies that are centred in or emerge from Indigenous worldviews, epistemologies, and ontology. This new edited collection moves beyond asking what Indigenous research is and examines how Indigenous approaches to research are carried out in practice. Contributors share their personal experiences of conducting Indigenous research within the academy in collaboration with their communities and with guidance from Elders and other traditional knowledge keepers. Their stories are linked to current discussions and debates, and their unique journeys reflect the diversity of Indigenous languages, knowledges, and approaches to inquiry. **Indigenous Research: Theories, Practices, and Relationships** is essential reading for students in Indigenous studies programs as well as for those studying research methodology in education, health, sociology, anthropology, and history. It offers vital and timely guidance on the use of Indigenous research methods as a movement toward reconciliation.

How Qualitative Data Analysis Happens Áine M. Humble, M. Elise Radina, 2018-12-07
Winner of the 2020 Anselm Strauss Award for Qualitative Family Research, National Council on Family Relations. How is qualitative data actually collected, analyzed, and accomplished? Real stories of how qualitative data analysis occurs. **Moving Beyond Themes Emerged** offers an in-depth look into how qualitative social science researchers studying family issues and dynamics approach their data analyses. It moves beyond the usual vague statement of themes emerged from the data to show readers how researchers actively and consciously arrive at their themes and conclusions, revealing the complexity and time involved in making sense of thousands of pages of interview data, multiple data sources, and diverse types of data. **How Qualitative Data Analysis Occurs** focuses on a diversity of topics in family research across the life course. The various authors provide detailed narratives into how they analyzed their data from previous publications and what methodologies they used, ranging from arts-based research, autoethnography, community-based participatory research, ethnography, grounded theory to narrative analysis. Supplemental figures, images, and screenshots, which are referred to in the chapters, are included in an accompanying eResource, as well as links to the previously published work on which the chapters are based. This book is an invaluable resource for experienced and novice qualitative researchers throughout the social sciences.

Reading Prehistoric Human Tracks Andreas Patoors, Tilman Lenssen-Erz, 2021-02-26
This Open Access book explains that after long periods of prehistoric research in which the importance of the archaeological as well as the natural context of rock art has been constantly underestimated, research has now begun to take this context into focus for documentation, analysis, interpretation, and understanding. Human footprints are prominent among the long time under

researched features of the context in caves with rock art In order to compensate for this neglect an innovative research program has been established several years ago that focuses on the merging of indigenous knowledge and western archaeological science for the benefit of both sides The book gathers first the methodological diversity in the analysis of human tracks Here major representatives of anthropological statistical and traditional approaches feature the multi layered methods available for the analysis of human tracks Second it compiles case studies from around the globe of prehistoric human tracks For the first time the most important sites which have been found worldwide are published in a single publication The third focus of this book is on firsthand experiences of researchers with indigenous tracking experts from around the globe expounding on how archaeological science can benefit from the ancestral knowledge This book will be of interest to professional archaeologists graduate students ecologists cultural anthropologists and laypeople especially those focussing on hunting gathering and pastoralist communities and who appreciate indigenous knowledge Sacred Ecology Fikret Berkes, 2017-09-01 Sacred Ecology examines bodies of knowledge held by indigenous and other rural peoples around the world and asks how we can learn from this knowledge and ways of knowing Berkes explores the importance of local and indigenous knowledge as a complement to scientific ecology and its cultural and political significance for indigenous groups themselves With updates of relevant links for further learning and over 180 new references the fourth edition gives increased voice to indigenous authors and reflects the remarkable increase in published local observations of climate change Living in Different Worlds Simultaneously Ntozakakale Simon Cezula, Benjamin D.
