Artificial Intelligence and the Future of Work: Humans in Control Ekkehard Ernst, Janine Berg, Phoebe V. Moore, 2024-10-01 Artificial Intelligence AI is rapidly advancing in areas such as pattern detection classification and prediction which were long thought to be the exclusive realm of humans These developments are triggering excitement about the potential of AI but are also raising concerns about possible risks The versatility of AI and its speed of development have led to a wide range of applications both in personal and professional environments The most dramatic effects are however in the world of work AI is impacting job loss and employability and causing a transformation of tasks in a range of occupations and sectors It is also affecting other aspects of the labor market such as recruitment performance monitoring and dismissal As such the development and implementation of AI are raising concerns about the future of work both in terms of its mere existence and quality with critical implications for the social fabric as well as future development prospects

Meanings of Public and the Future of Public Services David A. McDonald, 2022-09-09 Critically assessing meanings of the term public this book situates the emergence and expansion of public services within market based forms of production and consumption It highlights the potential for making public services more progressive within market societies but underscores their ongoing capture by private interests and emphasises the inherent limits of reform within a bourgeois public sphere The author explores opportunities for more expansive forms of non marketized

public services examining emerging debates on the theory and practice of equitable participatory and sustainable forms of publicness that go beyond mere ownership The book then asks how we can build a robust international pro public movement that juggles universal needs with local context With a focus on essential public services such as water electricity and health the text is global in its scope and written for a broad audience It will be useful for those interested in social and public policy public services and public administration political theory economic geography social movements sustainability and development
