**Governance of Integrated Product Policy** Dirk Scheer, Frieder Rubik, 2006 European policy patterns are in a state of transformation New governance models are shifting power away from states and toward the involvement of all stakeholders and the idea of shared responsibility It s a move from command and control to push and pull What s in this new approach for the environment This book provides a detailed analysis of the example of integrated product policy IPP which aims to improve the environmental performance of products and services through their life cycle All products cause environmental degradation in some way whether from their manufacturing use or disposal The life cycle of a product is often long and complicated It covers all the areas from the extraction of natural resources through their design manufacture assembly marketing distribution sale and use to their eventual disposal as waste At the same time it also involves many different actors such as designers manufacturers marketers retailers and consumers IPP attempts to systematically stimulate each phase of this complicated chain to improve its environmental performance With the involvement of so many different products and actors there cannot be one simple policy measure for everything Instead IPP employs a whole variety of tools both voluntary and mandatory which are used to achieve identified objectives These include economic instruments the phase out of dangerous materials voluntary agreements eco labelling and product design guidelines IPP is still in relative infancy and can be seen as an ongoing process hugely dependent on effective governance measures to ensure its continued success This book presents a plethora of perspectives from policy makers researchers and consultancies representatives from business environmental and consumer associations on how to effectively conceptualise institutionalise and implement IPP The book is divided into four parts First the approach to the governance of IPP is examined in relation to other approaches to sustainable production and consumption Second the widely differing approaches to environmental product policy in practice at national supranational and global level are analysed Third the book explores the challenge of designing a coherent policy mix to

support the integration of sustainable consumption and production patterns by sector and theme Finally the book concentrates on the key issue of how to involve stakeholders in IPP in order to encourage continuous innovations for sustainability throughout the value chain Governance of Integrated Product Policy aims to fill a clear gap in work to date on sustainable production and consumption by providing researchers and practitioners from politics business and civil society new insights into modern environmental governance in practice **JICA Annual Report** Kokusai Kyōryoku Kikō, White Papers of the Chinese Government (2009-2011) ,2012 *Hardware Retailer* ,1971 Annual Report Kokusai Kyōryoku Jigyōdan,2008 **Wallaces Farmer** ,2022-04
