Studies In Public Regulation:

Studies in Public Regulation Gary Fromm, 1983 This is a stimulating collection Each paper makes an original contribution to some aspect of the economics of regulation Contributors Paul L Joskow Roger G Noll Robert D Willig Elizabeth E Bailey Patricia Munch Dennis Smallwood Richard C Levin Robert A Leone John E Jackson Melvyn A Fuss Leonard Waverman Kenneth C Baseman and Sam Peltzman A Regulation of Economic Activity series paperback *Public Regulation of Tumor Banks* Xavier Bioy, 2018-06-30 The multidisciplinary book assesses the legal and economic uncertainties surrounding the collection storage provision and economic development of biological samples tumors tissues cells and associated personal data related to oncology Public partly public and private sector actors in the field of cancer care and research hold collections supported by significant public and social funding Under certain conditions particularly in the context of networking sometimes promoted by public authorities these collections can also represent major economic assets and scientific resources However this involves a number of issues and institutional constraints legal the will of the source person non pecuniary damage freedom to establish collections competence in deciding on their use legal frameworks for their distribution desire for return on investment for public institutions notably in terms of industrial and intellectual property economic cost of establishing and running biological resource centres destroying resources emerging markets profit sharing public health policy choices prioritisation of therapeutic measures over research fundamental or clinical trials conservation of resources promotion of scientific and not commercial value of collections The establishment heritage recognition patrimonialisation development and sharing of these resources thus merit our calling into question present practices and their evolution as well as the leverage available to public authorities incentives legislation regulation in a context where norms emerge from professional practice to become widely used in collaborative networks Filling a gap in the current literature on law and economics which pays little heed to these specific considerations this book explores these considerations to bring to light the economic implications of ethical choices and governance issues in the health sector structural organisation of local national and European actors in oncology It is intended for researchers in fields such as law economics and biomedical sciences as well as for public policymakers *Public Procurement and the EU Competition Rules* Albert Sánchez Graells, 2015-06-25 Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market This process of convergence between competition and public procurement law is particularly apparent in the 2014 Directives on public procurement which consolidate the principle of competition in terms very close to those advanced by the author in the first edition This second edition builds upon this approach and continues to ask how competition law principles inform and

condition public procurement rules and whether the latter in their revised form are adequate to ensure that competition is not distorted The second edition also deepens the analysis of the market behaviour of the public buyer from a competition perspective Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of these rules against a standard of the proper functioning of undistorted competition in the market for public procurement It also traces the increasing relevance of competition considerations in the case law of the Court of Justice of the European Union and sets out criteria and recommendations to continue influencing the development of EU Economic Law
