A Study of Novice Programmer Performance and Programming Pedagogy Michael Dacey, 2018 *Cases on Interdisciplinary Research Trends in Science, Technology, Engineering, and Mathematics: Studies on Urban Classrooms* Lansiquot, Reneta D., 2012-10-31 Involving two or more academic subjects interdisciplinary studies aim to blend together broad perspectives knowledge skills and epistemology in an educational setting By focusing on topics or questions too broad for a single discipline to cover these studies strive to draw connections between seemingly different fields Cases on Interdisciplinary Research Trends in Science Technology Engineering and Mathematics Studies on Urban Classrooms presents research and information on implementing and sustaining interdisciplinary studies in science technology engineering and mathematics for students and classrooms in an urban setting This collection of research acts as a guide for researchers and professionals interested in improving learning outcomes for their students

End User Development Henry Lieberman, Fabio Paternò, Volker Wulf, 2006-11-01 This book makes important aspects of the international discussion on End User Development EUD available to a broader audience It offers a unique set of contributions from research institutes worldwide addressing relevant issues and proposing original solutions This broad look at the emerging paradigm of End User Development will inspire every reader to appreciate its potential for the future Indeed the editors hope that readers end users will themselves become developers

A Descriptive Study of the Software Development Practices of Novice Programmers Cynthia Yvette Lester, 1996

Empirical Studies of Programmers Curtis R. Cook, Jean C. Scholtz, James C. Spohrer, 1993 This volume looks at the obvious trend in the computing evolution from studies of student programmers and toward studies of real programmers performing real programming tasks The percentage of student and professional programmers in the studies

reported in papers presented at ESP 1 and ESP 5 has nearly flip flopped There is now an emphasis on the practical application of the research results both in industry and in academia The papers and posters of this workshop include a range of programming language paradigms beyond the procedural paradigm functional logic visual object oriented and concurrent programming This appears to be an indication of the maturation of the field No longer is it a question of whether to study programmers but more a question of which aspects of the programming that make it an important area of study

Psychology of Programming J.-M. Hoc, 2014-05-19 Psychology provides a backdrop for most of the study of human computer interaction In this volume the psychological issues that pertain to programming rather than systems design are examined in four sections Theoretical and Methodological Issues Language Design and Skill Acquisition Expert Programming and the Future The book was inspired by working groups in France and the United Kingdom but also includes work by major North American figures such as Curtis and Soloway It is the first comprehensive work on this topic since the early 1980s

Empirical Studies of Programmers Elliot Soloway, Sundararaja S. Iyengar, 1986 This volume studies programmers to gain insights to facilitate improved productivity and quality software The chapters cover a range of topics including cognitive models of programming measuring program complexity the effects of program style and structure on program comprehension production and maintenance documentation the effects of control structures and data structures on program comprehension production and maintenance evaluations of program design and construction methodologies teaching strategies and assessment of programmer abilities

Intelligent Environments 2021 Mitja Luštrek, 2021-06-15 Intelligent environments IE combine physical spaces with ICT and pervasive technology to improve a user's awareness of their surroundings empower them to carry out tasks enrich their experience and enhance their ability to manage such environments A growing community from academia to practitioners is working to bring intelligent environments to life This work is driven by the innovative ideas and technological progress that are making the sensors and computing devices required for intelligent environments more affordable and energy efficient This book presents papers from Workshops held during the 17th International Conference on Intelligent Environments IE2021 The conference was due to take place in Dubai UAE but was held as a virtual event from 21 to 24 June 2021 due to the restrictions associated with the Covid 19 pandemic Included here are the proceedings of the 10th International Workshop on the Reliability of Intelligent Environments WoRIE 21 the 3rd International Workshop on Intelligent Environments and Buildings IEB 21 the 1st International Workshop on Self Learning in Intelligent Environments SeLIE 21 and the 1st International Workshop on Artificial Intelligence and Machine Learning for Emerging Topics ALLEGET 21 The contributions to these workshops reflect the multi disciplinary and transversal aspects of intelligent environments and cover the latest research and development in intelligent environments and related areas focusing on pushing the boundaries and contributing to the establishment of intelligent environments in the real world Offering a state of the art overview of current progress the book will be of particular interest to all those

working in the field of intelligent environments Proceedings of the Twenty-second SIGCSE Technical Symposium on Computer Science Education Nell Dale,1991 *Readings in Artificial Intelligence and Software Engineering* Charles Rich,Richard C. Waters,2014-06-28 *Readings in Artificial Intelligence and Software Engineering* covers the main techniques and application of artificial intelligence and software engineering The ultimate goal of artificial intelligence applied to software engineering is automatic programming Automatic programming would allow a user to simply say what is wanted and have a program produced completely automatically This book is organized into 11 parts encompassing 34 chapters that specifically tackle the topics of deductive synthesis program transformations program verification and programming tutors The opening parts provide an introduction to the key ideas to the deductive approach namely the correspondence between theorems and specifications and between constructive proofs and programs These parts also describes automatic theorem provers whose development has be designed for the programming domain The subsequent parts present generalized program transformation systems the problems involved in using natural language input the features of very high level languages and the advantages of the programming by example system Other parts explore the intelligent assistant approach and the significance and relation of programming knowledge in other programming system The concluding parts focus on the features of the domain knowledge system and the artificial intelligence programming Software engineers and designers and computer programmers as well as researchers in the field of artificial intelligence will find this book invaluable *Affective Computing and Intelligent Interaction* Sidney D'Mello,Arthur Graesser,Bjoern Schuller,Jean-Claude Martin,2011-09-23 This volume constitutes the refereed proceedings of the Fourth International Conference on Affective Computing and Intelligent Interaction ACII 2011 held in Memphis TN USA in October 2011 Themes in Education ,2001 **Proceedings of the Twenty-seventh SIGCSE Technical Symposium on Computer Science Education** John Impagliazzo,Association for Computing Machinery. Special Interest Group on Computer Science Education,1996 *The Graphical Representation of Programming* Ann Cunniff,1988 **Teaching for Fluency with Information Technology** Mark George Urban-Lurain,2000 MARCEL James C. Spohrer,1992 This volume describes a cognitive model of student programmers and an implementation of that model that allows student programmers to be simulated The focus of the model is on the problem solving that students perform to generate both correct and buggy programs as well as on the individual differences that cause different students to generate different programs for the same programming task By developing a taxonomy of student programmer knowledge a model of student program generation and a preliminary model of individual differences this research contributes to a better understanding of four areas of the study of student programmers The most important claim is that a cognitive model of student program generation fits within a properly fleshed out generate test and debug GTD problem solving architecture in which impasse repair knowledge plays a key role This research is important theoretically because it explores the use of a GTD impasse repair problem solving architecture in a new domain and important practically

because of its educational implications for programming instructions Fifth International Conference on Software Reuse
Association for Computing Machinery, 1998 Software reuse saves time and effort and will continue to play a dominant role in
successful engineering efforts This volume contains insights new directions and experience from leading reuse experts
around the world It addresses topics of interest to researchers practitioners and managers *Logic Programming* Robert
Kowalski, Kenneth A. Bowen, 1988 These two volumes collect papers presented at the first joint meeting of the two principal
logic programming conferences held in August of 1988 The more than fifty contributions cover all aspects of the field
including applications particularly those that exploit the unique character of logic programming the role of logic
programming in artificial intelligence deductive databases relations to other computational paradigms language issues
methodology implementations on sequential and parallel architectures and theory Logic Programming is included in the
Logic Programming series Research Reports and Notes edited by Ehud Shapiro
