Plantation Crops, Plunder and Power James F. Hancock, 2017-02-17 Over the last five centuries plantation crops have represented the best and worst of industrialized agriculture best through their agronomic productivity and global commercial success and worst as examples of exploitative colonialism conflict and ill treatment of workers This book traces the social political and evolutionary history of seven major plantation crops sugarcane banana cotton tea tobacco coffee and rubber It describes how all of these were domesticated in antiquity and grown by small landowners for thousands of years before European traders and colonists sought to make a profit out of them The author relates how their development and spread were closely associated with government expansionist policies They stimulated the exploration of far off lands were the focus of major conflicts and led to the enslavement of both native and displaced peoples From the southern United States Latin America and the Caribbean to Asia and Africa plantation crops turned social structures upside down leading to revolution and government change The economies of whole countries became tied to the profits of these plantations leading to internal power struggles to control the burgeoning wealth Open warfare routinely broke out between the more powerful countries and factions for trade dominance This book shows that from the early 1500s to today at least one of the plantation crops was always at the center of world politics and that this still continues today for example with the development of oil palm plantations in Southeast Asia Written in an accessible style it is fascinating supplementary reading for students of agricultural environmental and colonial history World Agriculture Before and After 1492 James F Hancock, 2022-11-11 The year 2022 is the 50th anniversary of Alfred Crosby s celebrated book *The Columbian Exchange Biological and Cultural Consequences of 1492* In the book Crosby was the first to discuss the impact that the Spanish and Portuguese colonial period had on world agriculture and human culture How the crops of the world became homogenized and how an indigenous culture was destroyed by disease after Columbus landed His landmark study broke new ground in its broad conceptualization of the Atlantic exchange Building on what Crosby so succinctly and brilliantly presented the main goal of this new work is to present the depth of information that has emerged since *The Columbian Exchange* and to discuss more fully the development of crops and agriculture before and after the Iberian contact It follows the journey of crops and livestock in the Old and New Worlds and ends with their distribution in today s world Escritos y discursos: Estudios sobre las leyes de tierras públicas Nicolás Avellaneda, 1910 **Diccionario filológico-comparado de la lengua castellana** Matías Calandrelli, 1881
