Steele,2007-10-08 Dates form the backbone of written history But where do these dates come from Many different calendars were used in the ancient world Some of these calendars were based upon observations or calculations of regular astronomical phenomena such as the first sighting of the new moon crescent that defined the beginning of the month in many calendars while others incorporated schematic simplifications of these phenomena such as the 360 day year used in early Mesopotamian administrative practices in order to simplify accounting procedures Historians frequently use handbooks and tables for converting dates in ancient calendars into the familiar BC AD calendar that we use today But very few historians understand how these tables have come about or what assumptions have been made in their construction The seven papers in this volume provide an answer to the question what do we know about the operation of calendars in the ancient world and just as importantly how do we know it Topics covered include the ancient and modern history of the Egyptian 365 day calendar astronomical and administrative calendars in ancient Mesopotamia and the development of astronomical calendars in ancient Greece This book will be of interest to ancient historians historians of science astronomers who use early astronomical records and anyone with an interest in calendars and their development      **The Dance of Time** Michael Judge,2011-11-21 Did you know that the ancient Romans left sixty days of winter out of their calendar considering these two months a dead time of lurking terror and therefore better left unnamed That they had a horror of even numbers hence the tendency for months with an odd number of days That robed and bearded druids from the Celts stand behind our New Year s figure of Father Time That if Thursday is Thor s day then Friday belongs to his faithful wife Freya queen of the Norse gods That the name Easter may derive from the Anglo Saxon goddess of spring Eostre whose consort was a hare our Easter Bunny Three streams of history created the Western calendar first from the Sumerians then from the Celtic and Germanic peoples in the North and finally from Palestine with the rise of Christianity Michael Judge teases out the contributions of each stream to the shape of the calendar to the days and holidays and to associated lore In them he finds glimpses of a way of seeing

before the mechanical time of clocks when the rhythms of man and woman matched those of earth and sky and the sacred was born

**The Perfect Time** Mark J. Silen, 2010-12 In 1995 Mark Silen was playing around with simple math and working with calendars when he stumbled upon something so amazing that he began to question nearly everything he had ever been taught In *The Perfect Time The Universal Calendar* Silen shares the results of his research into one of the biggest coincidences in history that man could have potentially missed the perfect measurement of time by one day Never in a million years did Silen think that seven numbers two easy addition equations and six simple multiplication equations would apply to so many disciplines but as he began to create his Universal Calendar he realized that many issues in religion mathematics science and history could have been forever affected by the use of these seven perfect numbers As Silen shares an easy to understand system based on common knowledge and logic he questions why we are still using a calendar system today that was created by people who thought the earth was flat The fascinating system behind *The Perfect Time The Universal Calendar* illustrates all the reasons why a new more simplistic calendar could have a major impact on today's society and have more meaning than any other calendar in history
