stay ahead Written in plain language free of jargon and grounded in real world experience this book restores confidence by replacing fear with understanding shame with clarity and helplessness with practical action Digital Safety for All is an essential guide for Seniors and older adults Caregivers and families Professionals and retirees Community leaders coaches and educators Anyone who uses a phone computer or digital service Digital safety is no longer an IT issue It is a life skill and this book shows you how to master it Creating Responsible and Inclusive Fashion Brand Narratives Emily

Huggard,2025-09-05 This book introduces the theories and frameworks necessary to drive meaningful social change in fashion brand communication illustrating their applications with examples of brands that prioritize social justice decolonization and environmental sustainability in their practices and communication strategies Drawing on social consumer and cultural theories such as Indigenous dress theory circularity fat liberation and social reproduction this book encourages students to think critically about brand communication in ways that are relevant impactful and aimed at transforming discourse and ideologies rather than focusing solely on products Through case studies ranging from Polo Ralph Lauren s collaboration with Indigenous weaver Naomi Glasses to material regeneration at Veja the authors demonstrate how these narratives can be applied in practice while raising ethical questions about transparency and authenticity in fashion brand messaging Readers will not only gain an understanding of why more inclusive and equitable brand narratives are essential but also develop the knowledge and critical thinking skills needed to analyze interpret and contribute to the ongoing transformation of fashion brand storytelling Creating Responsible and Inclusive Brand Narratives will be of interest to advanced students of Fashion Communication Marketing and Brand Management **A Metaverse for the Good: Design, Application and Understanding** Maria V. Sanchez-Vives,Mel Slater,Omar Niamut,Xueni Pan,Lucio Lamberti,Anna

Kobusinska,Piotr Skrzypczynski,Doron Friedman,Aurelio López-Tarruella Martínez ,Matthias Quent,2026-01-16 The metaverse is a large scale social environment based on the convergence of virtual and physical reality Participants can take part in the metaverse through virtual augmented or mixed reality They can carry out everyday activities together ranging from entertainment through to education business politics health or even legal proceedings This may have a profound impact on the way we live providing new beneficial ways of carrying out a multitude of activities but may also introduce a multitude of problems that we cannot envisage Mobile devices in conjunction with the world wide web and social media have led to revolutionary changes in society including on the positive side deep connectivity between people but on the other a potential threat to democracy The immersive nature of the metaverse will potentially enhance both the positive and negative impact by an order of magnitude The metaverse is an idea rather than a reality There exist systems that offer nascent examples of a metaverse such as VRChat Horizon Worlds Decentraland and others but these are virtual environments that can be visited simultaneously by a multitude of participants who can see avatars of one another and interact together in limited ways Such systems have been around since the 1990s usually called collaborative virtual environments CVEs The modern versions

introduce conceptually nothing new except for their scale in implementation Even the avatars often used today are hardly more elaborate than those that were used in the 1990s and early 2000s although today we have the possibility of using personalized avatars of increasing quality Therefore the central problem to be addressed in this Research Topic is to foresee how a metaverse might actually go beyond the well known idea and implementations of CVEs How will experiences in the metaverse be different from experiences in CVEs What technology underpins the creation of such a metaverse What applications are likely to emerge across a range of activities that are likely to be positive for humanity What are the ethical legal and political implications both positive and dangers Primarily what evidence can be offered to support the views or findings of the authors This Research Topic is in conjunction with the conference A Metaverse for the Good although submissions that were not initially presented at this conference are also welcome Papers may be of any of the types afforded by Frontiers although those that include empirical evidence for the arguments that they present will be prioritized The themes of the Research Topic include the following ideally including specific evidentiary examples Metaverse as an agent for a more inclusive responsible and sustainable business and economic environment The economic impact of the metaverse on companies industries and economies The future of work for example whether working from home in immersive real time collaboration with others around the world including with people physically present at the workplace will be feasible Are there examples of this today New models for metaverse based education massive online physical and virtual classrooms that anyone can join from anywhere The use of AI in the foundations implementation and applications in a metaverse The impact of immersive experiences on the individuals in terms of learning engagement self efficacy Technical challenges including computer graphics distributed and networked systems block chain human computer interaction Neurotechnology for example whether people will be able to interact in the metaverse through brain computer interfaces and the impact for people with physical disabilities Ethical regulatory and legal aspects ranging from ethical problems including the use of AI how the metaverse might be regulated The metaverse for medical and psychiatric treatment
