The theoretical perspectives examined span a wide variety of religious, legal, medical, psychological, social, economic, and political concerns. Throughout, attention is drawn to the ways that both images of deviance and strategies of social control are shaped by powerful social forces located at the historical intersections of gender, race, and class. In addition, references to literature, film, music, and painting are integrated to show parallels between images of deviance produced by scientists and those produced by artists. Social Control and Deviance Ali Wardak, 2018-02-05. This title was first published in 2000. This book provides an empirical account of social control and deviance in a South Asian community in Scotland, focusing on Edinburgh's Pakistani community. The book examines the social order of this particular community and the ways it is maintained. It explores the various social institutions and processes that operate as mechanisms of informal social control within the community. This book also examines the ways the second generation South Asians relate to their community and the extent to which they conform or deviate from its norms. Criminological social control theory is used as an analytical framework for explaining deviance. It is concluded that the South Asian youngsters, boys who have weak, broken bonds with their community, are more likely to deviate from its norms. The book further concludes that social control and deviance are intricately interrelated. While social control defines what is deviance, the latter has important implications for the former: repeated occurrence of deviance prompts agencies of social control to redefine and gradually normalize deviance. Social Control Edward Alsworth Ross, 1901. *A Theory of Social Control* Richard Tracy LaPiere, 1954. **Social Control** Edward Alsworth Ross, *Social Control* falls within social psychology, which is the branch of knowledge that deals with the psychic interplay between man and his environment. In Ross's terms, one of these branches, social ascendancy, deals with the domination of society over the individual. Another individual ascendancy embraces such topics as invention, leadership, the role of great men, and deals with the domination of the individual over society. Social ascendancy is divided into social influence, mob mind, fashion, convention, custom, public opinion, and the like, and social control. The former is occupied with social domination that is without intention or purpose. The latter is concerned with social domination that is intended and that fulfills a function in the life of society. At the start of the twentieth century, this work played an important role in the origination of social psychology as a distinct field. Ross sought to determine how far the order we see about us is due to influences that reach men and women without social intervention. Investigation shows that the personality freely unfolds under conditions of healthy fellowship and may arrive at goodness on its own, and that order is explained partly by this streak in human nature and partly by the influence of social

surroundings Ross book separates the individual's contribution to social order from that of society and brings to light everything that is considered in the social contribution of the individual. This classic volume is an important contribution to the history of ideas. Edward Alsworth Ross (1866-1951) was known as one of the founders of American sociology and was most famous for his view that the purpose of sociology is the reform of society. He was also professor and chair of the department of sociology at the University of Wisconsin. Some of his work includes *Sin and Society*, *Changing America*, and *The Social Trend*.

Matthias Gross is senior research scientist in the Helmholtz Centre for Environmental Research in Leipzig, Germany. He is the author of five books and numerous articles on the history of the social sciences, environmental sociology, and science and technology studies.

Castles of our Conscience William G. Staples, 2013-05-02 *Castles of our Conscience* presents a new and distinctive analysis of the role of the modern state in the shaping of policies of social control. Staples provides a theoretical framework for understanding the mechanisms of state policy making and capacity. This framework supports an interpretation of the changing nature of institutions of social control in the United States from the beginning in the nineteenth century to the present day. A distinctive feature of the author's approach is his critique of existing theories of the state as well as recent revisionist writing in social control. Both he argues have tended to either reduce the state to an instrument of class power or treat it in too structuralist a fashion. Developing a sophisticated account of the relationship between the state and civil society, he provides a history of social control policies in the United States that balances analytical concerns with historical narrative. This book will be of interest to students and professionals in sociology, politics, and criminology.

Crime Prevention in the Urban Community Kōichi Miyazawa, Setsuo Miyazawa, 1995-04-30 One of today's most pressing issues in criminology and crime prevention is the problem of crime in our cities and towns and its prevention. The topic of crime prevention in the Urban Community was discussed at the 47th International Course of the International Society for Criminology (ISC) held at Chuo University, Tokyo. It was the very first time such an ISC meeting was held in Asia, and this meant that finally a relatively large number of Japanese and other Asian participants were able to express their views on criminal policy and crime prevention in urban centres all over the world. Crime in urban communities is not an exclusively Western phenomenon but it is also a considerable problem in other parts of the world. This makes an interchange of ideas between Western, Eastern, and Third World criminologists particularly important. General characteristics of the urban communities that suffer from a high crime rate are ethnic and racial tensions, a mix of old housing areas and new business districts, a prevailing sense of anonymity, slums, and juvenile delinquency. The existence of these general characteristics, besides mutual differences, makes cooperation in the crime prevention sphere definitely worth the effort.
