Competing for Land, Mangroves and Marine Resources in Coastal Vietnam Hue Le, 2021-08-30 This book presents a historical and ethnographic study of changing mangrove management in northern Vietnam over the past 100

years grounded in a case study in the Red River Delta in northern Vietnam The book shows that three primary socio economic dynamics have affected mangroves enclosure movements that have restricted access by different user communities over time such as the exclusion of women changing valuation of mangroves and their products and services and social and class differentiation caused by privatization of once common resources The result of these pressures have been erosions of norms rules and collective action to protect and nurture mangroves leading to widespread loss of coastal forests Sustainable mangrove management will require attention to these dynamics to address current day land conflicts The book will be of interest to policy makers practitioners and academics and students in forest policy management and governance rural livelihoods and globalization and agrarian change Yale Forest School News ,1992 *Social Differentiation* Cecil Clare North,1926 **Area Patterns** John Blunden,1977 Handbook of Sport and International Development Nico Schulenkorf,Jon Welty Peachey,Ramón Spaaij,Holly Collison-Randall,2023-11-03 With sport sustaining a prominent place in international development policymaking discourse and delivery this comprehensive Handbook provides a contemporary multi disciplinary overview of state of the art scholarship in this critical space It investigates the role that different sport initiatives from community focused projects to large scale events can play across a great variety of development contexts
