## **Social Systems And Learning Systems:**

*Social Systems and Learning Systems* A.F.G. Hanken, H.A. Reuver, 2012-12-06 In today's social and behavioral sciences the complexity of many problems requires the development of a number of highly specialized disciplines. However, the cost of such development is the obscuring of the relationships between these disciplines. This dilemma calls for a mixed strategy that combines the advantages of specialization with those of a unified viewpoint. The purpose of this book is to provide the connective tissue that is needed to obtain an overall view. The principles of general system theory naturally lead to a framework that includes many known models and content areas. Our intention is to strike a balance between generality and plain usefulness. The first part of this book introduces a social system as a network of interacting decision makers. This general framework allows a classification of a number of more specific structures which include autocratic and democratic systems, systems with collective and individual decision making, and systems with and without coalitions. In the second part various psychological schools are seen as specific instances of a general paradigm which is consequently a point of departure for a taxonomy of learning systems. For a full understanding of this matter we recommend a careful study of the first four chapters as an introduction to the concepts elaborated in the second part of the book. ix PREFACE x

Though the subject matter has a formal background it does not require a mathematical knowledge in depth. Familiarity with elementary probability theory and linear algebra is enough. [Auravana Social System](#) Auravana, 2022-07-12 This publication is the Social System for a community type society. It is a standardized social system for the organized structuring of a mutually fulfilled social population. A social system describes the organized structuring of a social environment. A social system is a grouping of units of individuation here units of consciousness forming a cooperative network in which information is shared and integrated through a whole data structure. The term social system is used in general to refer to lifeforms in definite relation to each other which have enduring patterns of behavior in that relationship. This social system standard identifies humanity's aligned interests and that which everyone has socially in common. It is an organizing system for social navigation that specifies a direction, orientation, and approach to socio-technical life. The standard details the purpose for the society's existence, a direction, its value system, an orientation, and its approach, a methodology, and methods. Herein these concepts, their relationships, and understandings are defined and modeled. Discursive reasoning is provided for the selection of this specific configuration of a social system as opposed to the selection and encoding of other configurations and their consequences are evidenced. The social system provides a description of who humanity is and where humanity is going by identifying its social organization.
