Solar Energy Update ,1980-04 Space Station Systems ,1990 Third Generation Photovoltaics Martin A. Green, 2006-09-05 Photovoltaics the direct conversion of sunlight to electricity is now the fastest growing technology for electricity generation Present first generation products use the same silicon wafers as in microelectronics Second generation thin films now entering the market have the potential to greatly improve the economics by eliminating material costs Martin Green one of the world s foremost photovoltaic researchers argues in this book that second generation photovoltaics will eventually reach its own material cost constraints engendering a third generation of high performance thin films The book explores self consistently the energy conversion potential of advanced approaches for improving photovoltaic performance and outlines possible implementation paths

Physics of Solar Cells Peter Würfel, 2009-03-23 Based on the highly regarded and extremely successful first edition this thoroughly revised updated and expanded edition contains the latest knowledge on the mechanisms of solar energy conversion The textbook describes in detail all aspects of solar cell function the physics behind every single step as well as all the issues to be considered when improving solar cells and their efficiency Requiring no more than standard physics knowledge the book enables both students and researchers to understand the factors driving conversion efficiency and to apply this knowledge to their own solar cell development New exercises after each chapter help students to consolidate their freshly acquired knowledge while the book also serves as a reference for researchers already working in this exciting and challenging field
