Soviet Architectural Competitions, 1920s-1930s Catherine Cooke, I. A. Kazus', Igor Kazus, 1992 *Soviet Architectural Competitions, 1924-1936* Catherine Cooke, 1992 Bespreking van vijf prijsvraagontwerpen voor o a de Lenin bibliotheek 1928 het Paleis van de Sovjets 1931 1933 en het Volkscommissariaat van de zware industrie 1934 1936 **Soviet Architectural Avant-Gardes** Danilo Udovicki-Selb, 2020-05-14 Conventional readings of the history of Soviet art and architecture show modernist utopian aspirations as all but prohibited by 1932 under Stalin's totalitarianism Soviet Architectural Avant Gardes challenges that view Radically redefining the historiography of the period it reveals how the relationship between the Party and practicing architects was much more complex and contradictory than previously believed and shows in contrast to the conventional scholarly narrative how the architectural avant garde was able to persist at a time when it is widely considered to have been driven underground In doing so this book provides an essential perspective on how to analyse evaluate and re imagine the history of modernist expression in its cultural context It offers a new understanding of ways in which 20th century social revolutions and their totalitarian sequels inflected the discourse of both modernity and modernism The book relies on close analyses of archival documents and architectural works Many of the documents have been rarely if ever discussed in English before while the architectural projects include iconic works such as the Palace of Soviets and the Soviet Pavilion at the Paris 1937 World Exposition as well as remarkable works that until now have been neglected by architectural historians inside and outside Russia In a fascinating final chapter it also reveals for the first time the details of Frank Lloyd Wright's triumphant welcome at the First Congress of Soviet Architects in Moscow in 1937 at the height of Stalin's Terror

between architecture and socialism into focus through detailed case studies that situate buildings and architectural concepts within the socialist milieu of Soviet society He tracks the way Russian architectural institutions departed from the course of modernism being developed in capitalist countries and he reappraises the architecture of the Stalin era and the final decades of the USSR Finally he traces the influence of Soviet conventions on contemporary Russian architecture which is now a more heterogeneous mix of approaches and styles and how it made a lasting and little known impact on territories extending from the Middle East to Central Asia and into China A bold new assessment of Russia s architectural legacy and contemporary contributions this book is a fascinating exploration of a tumultuous place and the creativity that has come from it
