dominant use as a means of deflecting attention back to earth and earthly concerns As Norman Cousins states the most significant achievement of that lunar voyage Apollo 11 was not that man set foot on the Moon but that he set eyes on Earth This timely study includes the responses of writers scientists historians theologians philosophers and those who have experienced space first hand the astronauts Here we find of course Tom Wolfe and *The Right Stuff* Carl Sagan James Michener and Norman Mailer But Weber also discusses Oriana Fallaci Ben Bova Ken Kesey Saul Bellow Ray Bradbury and others as they offer a literary embodiment of this newest and perhaps ultimate phase of American journeying the newest New World the darkest frontier Weber finds that in the first quarter century of the space age our writers have been more attentive to the familiar attractions of earth than the mysteries of outer space paradoxically in their accounts of space returning us to earth Seeing Earth is offered however as a preliminary report The era of the space shuttle with the promise of routine journeys in space may well alter the response of writers We may come to see ourselves at home in space But so far the deepest sympathies of our writers have been directed to the origin of space rockets more than their exotic destinations Weber shows us that our literary accounts of space journeys have given us new instruction about earth and earthly life

Astronautics Ted Spitzmiller,2006 Chronicling the history of space rocketry this resource details the discoveries and engineering innovations that have occurred in both the United States and the former Soviet Union from World War II to the early 1970s From European war missiles to multibillion dollar spacecraft that orbit the earth today this sourcebook covers the evolution of rocketry in great detail and discusses the impact rocket science has had on other areas of humanity Filled with fascinating facts from history without technical jargon and specialized language this reference will interest both space enthusiasts and general readers alike **Astronautics: Dawn of the space age** Ted Spitzmiller,2006 *NASA SP.* ,1976
