**Ethical Artificial Intelligence in Power Electronics** Tarandeep Kaur Bhatia, Salma El Hajjami, Keshav Kaushik, Gayo Diallo, Mariya Ouaisa, Inam Ullah Khan, 2024-08-01 This book focuses on the techniques of artificial intelligence that are mainly used in the power electronics field for the optimization of lost vehicle power. With the intention of optimizing the powerful energy of the vehicles and producing reliable energy, the most efficient methods, algorithms, and strategies of ethical artificial intelligence (AI) are being applied. By employing machine learning methods, the optimization of power energy in vehicles can be quickly recovered and managed efficiently. In today's bustling world, power energy is indispensable for progress, yet in congested Vehicular Ad hoc Networks (VANETs), vehicles often face power depletion and decreased efficiency. This book explores these challenges, encompassing not only power but also other critical power electronics within vehicles. We aim to introduce innovative approaches leveraging ethical AI methods to optimize energy performance in the face of these difficulties. Through this exploration, we seek to provide practical insights into navigating congested VANET environments while upholding ethical principles in technological advancements. Our book will discuss the current power energy concerns faced by vehicles and also contribute a novel strategy to overcome those concerns. The employment of ethical AI in vehicular power energy will undoubtedly improve the effectiveness and production of vehicles. Current and Emerging Trends in Aging and Work Sara J. Czaja, Joseph Sharit, Jacquelyn B. James, 2019-09-13 This timely volume provides an up-to-date and comprehensive summary about what is known about aging and work and addresses the challenges and opportunities confronting older workers and organizations. The authors describe current and emerging topics related to work and aging adults, such as working in teams, the increasing diversity of the labor force, work and caregiving, the implications of technology for an aging workforce, and health and wellness issues. The authorship is international; the authors are renowned for their respective work in the topical areas and represent a broad range of disciplines within academia, as well as offer perspectives from government and policy. Jobs, organizations, the labor market, and the workforce are experiencing dramatic change. Workers of all ages, including older workers, need to interact with the wide variety of ubiquitous technologies that are reshaping work processes, job content, work settings, communication strategies, and the delivery of training, and this book aims to update readers on the particular issues facing today's aging adults in the workplace. The chapters' broad and inclusive scope encompasses Workplace aging and jobs in the 21st century, The retirement income security outlook for older workers, Population aging, age discrimination, and age discrimination protections, Older workers and the contemporary labor market, The role of aging, age diversity, and age heterogeneity within teams, The intersection of family caregiving and work. Current and Emerging Trends in Aging and Work is relevant to a broad audience of academic researchers, practitioners, and students in psychology, sociology, management, engineering, industrial and human factors, the health sciences, gerontology, geriatrics, and public health. It is also a useful resource for government and policy leaders, as well as workers and managers in the
