Becoming a Reader

Michael P. O'Donnell, Margo Wood, 1999 *Becoming a Reader A Developmental Approach to Reading Instruction* Second Edition is intended as a basic developmental reading text for preservice and in service teachers. It has been our experience in teaching undergraduate and graduate students in education that a developmental perspective of literacy learning provides a helpful framework for understanding the process. We have found that most textbooks on reading methods are organized topically with chapters on word identification, comprehension, study strategies, use of basal readers, literature, and classroom organization. *Becoming a Reader* is organized differently. We use a stage model of reading development to describe how children become skilled readers. Specific topics such as word identification and comprehension are discussed within this broader framework. The text represents a synthesis of current thinking about how literacy is acquired. We have endeavored to produce a reader friendly text by providing concise descriptions of the various aspects of literacy learning and instruction supplemented by examples and case studies. To avoid overburdening the reader with lengthy literature reviews, we have cited only the most current and relevant sources to document and support the viewpoints presented. As you read the text, bear in mind that we regard literacy learning as a language learning process that is best acquired through the functional, purposeful use of print. The instructional methods we advocate reflect this basic premise. [The Science of Reading](#)

Margaret J. Snowling, Charles Hulme, 2008-04-15 *The Science of Reading A Handbook* brings together state of the art reviews of reading research from leading names in the field to create a highly authoritative multidisciplinary overview of contemporary knowledge about reading and related skills. Provides comprehensive coverage of the subject including theoretical approaches, reading processes, stage models of reading, cross linguistic studies of reading, reading difficulties, the biology of reading and reading instruction. Divided into seven sections: Word Recognition Processes in Reading, Learning to Read and Spell, Reading Comprehension, Reading in Different Languages, Disorders of Reading and Spelling, Biological Bases of Reading, Teaching Reading. Edited by well respected senior figures in the field. [The Massachusetts register](#), 2001
