The Portfolio Approach to Assessment Emily Grady,1992 The shortcomings of standardized testing as the predominant form of student assessment in the United States are reviewed and the use and potential benefits of portfolio assessment are explored Children s educational experiences and their future job prospects and standards of living are being decided by test scores Moreover these test scores may be unfair or biased

against some students. Instead of more tests we need a new attitude toward assessment one that encourages a variety of assessments. Portfolio assessment through collections of student works can be an encompassing format for this new philosophy. Before considering what a portfolio should contain it is important to establish the purpose of the assessment. The experiences of Vermont illustrate the development of a portfolio assessment with consistent standards. Examples of guidelines for mathematics and language arts portfolios make it clear that it is possible to establish consistent practices. It is also necessary to reflect on the portfolio occasionally using self evaluations and direct questions or profiles. Educators also find portfolios useful tools for preservice teachers. Portfolio assessment can be the framework for a new curricular structure that integrates assessment into the learning loop.

SLD Teaching for Multiple Intelligences David G. Lazear, 1992. Over the past 50 years brain researchers have stated that human beings probably use less than 1 percent of the brain's potential and research findings about human intelligence have transformed almost all previous definitions of intelligence. This booklet addresses the following key findings in intelligence research: intelligence is not fixed or static; intelligence can be learned and taught; and intelligence is a multidimensional phenomenon that occurs at multiple levels of the brain/mind/body system. After this discussion of the research, the publication is divided into five parts: 1. Overview of the Seven Intelligences: verbal/linguistic, logical/mathematical, visual/spatial, body/kinesthetic, musical/rhythmic, interpersonal intelligence, and intrapersonal intelligence. 2. Teaching for Multiple Intelligences: A New Look at the Curriculum includes an exercise on how one can teach for multiple intelligences in one's curriculum. 3. New Instructional Methods for Teaching with Multiple Intelligences. 4. Teaching about Multiple Intelligences: Re-inventing the Learning Process and 5. A Multi-Modal Approach to Assessment includes techniques for student evaluation and teacher self-assessment. Contains 27 references. LL State Academies for the Academically Gifted James E. Green, 1993. This guide to residential state academies for academically gifted high school students discusses the history of this movement, student characteristics, curricula, faculty outreach programs, and evaluation. The establishment of the nine existing state institutions is traced from the prototype, the North Carolina School for Science and Mathematics, to the most recent established in Alabama in 1991. Reasons for such schools are given, ranging from the specialized curricula needed by such students to their need for peer support. The question of elitism is addressed, suggesting that such schools actually are egalitarian in that they provide an opportunity for all students from both poor and wealthy regions of the state to go as far as they can. The various selection processes are described and compared, noting that the use of holistic methods rather than standardized tests results in enrollments more consistent with the demographic profiles of the state's population. Curricula are discussed with special focus on the Indiana Academy. Criteria for selecting faculty are then briefly considered, as are state academy outreach programs. The lack of comprehensive and systematic evaluation of these new institutions is noted. Contains 21 references. DB Strategies for Involving Parents in Their Children's Education Linda T. Jones, 1991. This publication presents an overview of programs and practices that schools can

use for involving parents in the education of their children at home and in school The first chapter describes programs that demonstrate the ways in which parents can be involved in the education of their children of 1 to 5 years of age A list of 10 approaches for involving parents in their children s early education is included The second chapter discusses the topics of 1 improving communication between home and school 2 helping parents work with their children at home 3 involving parents in school activities 4 developing collaborative planning among parents students and teachers and 5 empowering parents to become decisionmakers in their children s schools The third chapter provides brief descriptions of parent workshops and activities that schools might want to offer or sponsor Some are for parents only others are for parents and children The fourth chapter describes types of school parent collaboration that can improve children s behavior attitudes and study habits The concluding chapter offers guidelines for planning a successful parent involvement program Contains 37 references RH

Initiating Restructuring at the School Site Robert J. McCarthy, 1991 **Implementing the Disabilities Acts** Patricia F. First, Joan L. Curcio, 1993 This booklet presents information helpful in implementing laws intended to extend full societal participation to individuals with disabilities Information concerning the Individuals with Disabilities Education Act of 1990 IDEA addresses the law s major provisions provisions for medically fragile children amendments and modifications and case law related to least restrictive environment A discussion of the Americans with Disabilities Act of 1990 reviews major provisions specific titles enforcement and remedies and the impact on schools Section 504 of the Rehabilitation Act of 1973 is also briefly described focusing on its impact on schools The pamphlet concludes that schools and school districts that have a commitment to inclusive education for all children will have no difficulty in complying with the requirements of these three laws JDD
