User-centered Research Jeffrey M. Lee,2018 Usability testing is a core tenet of user centered research A well constructed usability test allows companies to evaluate a product or service and gather real world feedback from users The goal of a usability test is to identify possible user experience problems and opportunities for improvement However many companies tend to forgo usability testing and instead make design decisions based on personal preferences or internal biases The focus of my study is to establish a usability baseline for Particle s product marketing website and harness user feedback to identify pain points and a direction for design improvements *Rhetoric and Experience Architecture* Liza Potts,Michael J.
