Tricky Tracks:

Whose Tricky Tracks Are Those? Christianne Jones,2026 In this interactive book readers can study photos of animal tracks and read the clues to guess what animal was on the move

The Nature of Science Dorothy Warren,2001 There are many different approaches to science Many students in school have a view of science that is far removed from the real world practice of science and they too often consider science to be a defined body of knowledge and scientists to know all the answers Through a series of exercises this book tries to give students an awareness of the processes of science and of the nature of science as a changing body of knowledge with uncertainties and much remaining to be discovered It is hoped that by using it teachers can communicate to their students some of the wonder and excitement of science and encourage the development of future generations of scientists The Nature of Science includes a range of activities designed to look at different aspects of the nature of science and to teach investigative skills to 11 19 year old students It contains teachers notes background information photocopiable student worksheets and answers

Darwin-Inspired Learning Carolyn J. Boulter,Michael J. Reiss,Dawn L. Sanders,2015-01-19 Charles Darwin has been extensively analysed and written about as a scientist Victorian father and husband However this is the first book to present a carefully thought out pedagogical approach to learning that is centered on Darwin s life and scientific practice The ways in which Darwin developed his scientific ideas and their far reaching effects continue to challenge and provoke contemporary teachers and learners inspiring them to consider both how scientists work and how individual humans read nature Darwin inspired learning as proposed in this international collection of essays is an enquiry based pedagogy that takes the professional practice of Charles Darwin as its source Without seeking to idealise the man Darwin inspired learning places importance on active learning hands on enquiry critical thinking creativity argumentation interdisciplinarity In an increasingly urbanised world first hand observations of living plants and animals are becoming rarer Indeed some commentators suggest that such encounters are under threat and children are living in a time of nature deficit Darwin inspired learning with its focus on close observation and hands on enquiry seeks to re engage children and young people with the living world through critical and creative thinking modeled on Darwin s life and science

The Nature of Science in Science Education W.F. McComas,2006-04-11 The Nature of Science in Science Education is the first book to blend a justification for the inclusion of the history and philosophy of science in science teaching with methods by which this vital content can be shared with a variety of learners It contains a complete analysis of the variety of tools developed thus far to assess learning in this domain This book is relevant to science methods instructors science education graduate students and science teachers
