**Richard Harrison Black**

uncompromising critique of Western beauty practice and the industries and ideologies behind it. Jeffreys argues that beauty practices are not related to individual female choice or creative expression but represent instead an important aspect of women's oppression. As these practices have become increasingly brutal and pervasive, the need to scrutinize and dismantle them is, if anything, more urgent now than it was in 2005 when the first edition of the book was published. The United Nations concept of harmful traditional cultural practices provides a useful lens for the author to advance her critique. She makes the case for including Western beauty practices within this definition, examining their role in damaging women's health, creating sexual difference, and enforcing female deference. First-wave feminists of the 1970s criticized pervasive beauty regimes such as dieting and depilation, but a later argument took hold that beauty practices were no longer oppressive now that women could choose them. In recent years, the reality of Western beauty practices has become much more bloody and severe, requiring the breaking of skin and the rearrangement or amputation of body parts. *Beauty and Misogyny* seeks to make sense of why beauty practices have not only persisted but become more extreme. It examines the pervasive use of makeup, the misogyny of fashion and high-heeled shoes, and looks at the role of pornography in the creation of increasingly popular beauty practices such as breast implants, genital waxing, surgical alteration of the labia, and other forms of self-mutilation. The book concludes by considering how a culture of resistance to these practices can be created. A new and thoroughly updated edition of this essential work will appeal to all levels of students and teachers of gender studies, cultural studies, and feminist psychology, and to anyone with an interest in feminism, women and beauty, and women's health.

**The Sign of the Cross** Daniel Rancour-Laferriere,2011-12-31 This book presents a unique effort to create a new understanding of the Christian sign of the cross At its core it traces the conscious and unconscious influence of this visual symbol through time What began as the crucifixion of a Jewish troublemaker in Roman occupied Judea in the first century eventually gave rise to a broad spectrum of readings of the instrument used to accomplish such a punishment a cross The author argues that Jesus was a provocative grandiose masochist whose suffering and death initially signified redemption for believers This idea gradually morphed into a Christian sense of freedom to persecute and wage war against non believers however as can be seen in the Crusades wars of the cross Many believers even construed the murder of their savior as a crime perpetrated by the Jews and this paranoid notion culminated in the mass murder of European Jews under the sign of the Nazi hooked cross Hakenkreuz Rancour Laferriere s book is expertly written and argued it will be readable to a large audience because it touches on many areas of controversy interest and scholarship The work is critical but not unfair it employs psychoanalysis art history the study of the symbol of the cross in works of art religion and religious texts and world history generally The interweaving of these various themes is what gives this work its ability to draw in readers and will ultimately be what keeps the reader interested through the conclusion
