Writing With Logic In Mind:

Writing with Logic in Mind Boyd,1994 This supplementary text focuses on the connection between critical thinking and the writing process A section of writing prompts in the book allows instructors to use the prompt that is appropriate for courses ranging from philosophy to English e g writing across the curriculum to history *Writing Science before the Greeks* Rita Watson,Wayne Horowitz,2011-03-21 The beginnings of written science have long been associated with classical Greece Yet in ancient Mesopotamia highly sophisticated scientific works in cuneiform script were in active use while Greek civilization flourished in the West The subject of this volume is the astronomical series MUL APIN which can be dated to the seventh century BCE and which represents the crowning achievement of traditional Mesopotamian observational astronomy *Writing Science before the Greeks* explores this early text from the perspective of modern cognitive science in an effort to articulate the processes underlying its composition The analysis suggests that writing itself through the cumulative recording of observations played a role in the evolution of scientific thought All in all the authors should be congratulated for this groundbreaking study Apart from significant new insights into MUL APIN it has opened up a new avenue for research on ancient scientific texts that is likely to yield further interesting results particularly if the cognitive analysis is combined with other approaches Mathieu Ossendrijver Humboldt University **An Analysis of Writing** Harold P. Scott,1923 [Ethics of Writing](#) Carlo Sini,2010-07-02 In this groundbreaking work Carlo Sini one of Italy s leading contemporary philosophers brings American pragmatism to the Milan school of phenomenology Appearing in English for the first time this book explores the constitutive role of alphabetic writing in the emergence of dominant forms of knowledge in the Western world philosophy mathematics science and historiography Taking stock of the contingent nature of what are held as logical truths he offers an ethical framework for considering different ways of thinking about writing focusing on possibilities involving practice as a basis for a renewal of theoretical philosophy Such a framework Sini argues opens the door for more productive and ethical communication with non Western cultures and indeed for a reconsideration of forms of knowledge beyond mere writing *The Educated Mind* Kieran Egan,2007-12-01 *The Educated Mind* offers a bold and revitalizing new vision for today s uncertain educational system Kieran Egan reconceives education taking into account how we learn He proposes the use of particular intellectual tools such as language or literacy that shape how we make sense of the world These mediating tools generate successive kinds of understanding somatic mythic romantic philosophical and ironic Egan s account concludes with practical proposals for how teaching and curriculum can be changed to reflect the way children learn A carefully argued and readable book Egan proposes a radical change of approach for the whole process of education There is much in this book to interest and excite those who discuss research or deliver education Ann Fullick *New Scientist* A compelling vision for today s uncertain educational system *Library Journal* Almost anyone involved at any level or in any part of the education system will find this a fascinating book to read Dr Richard Fox *British Journal of Educational Psychology* A fascinating and provocative
